BENCH LEGS

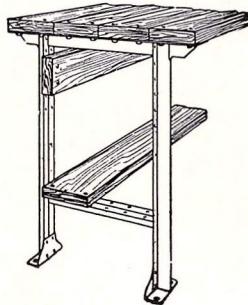

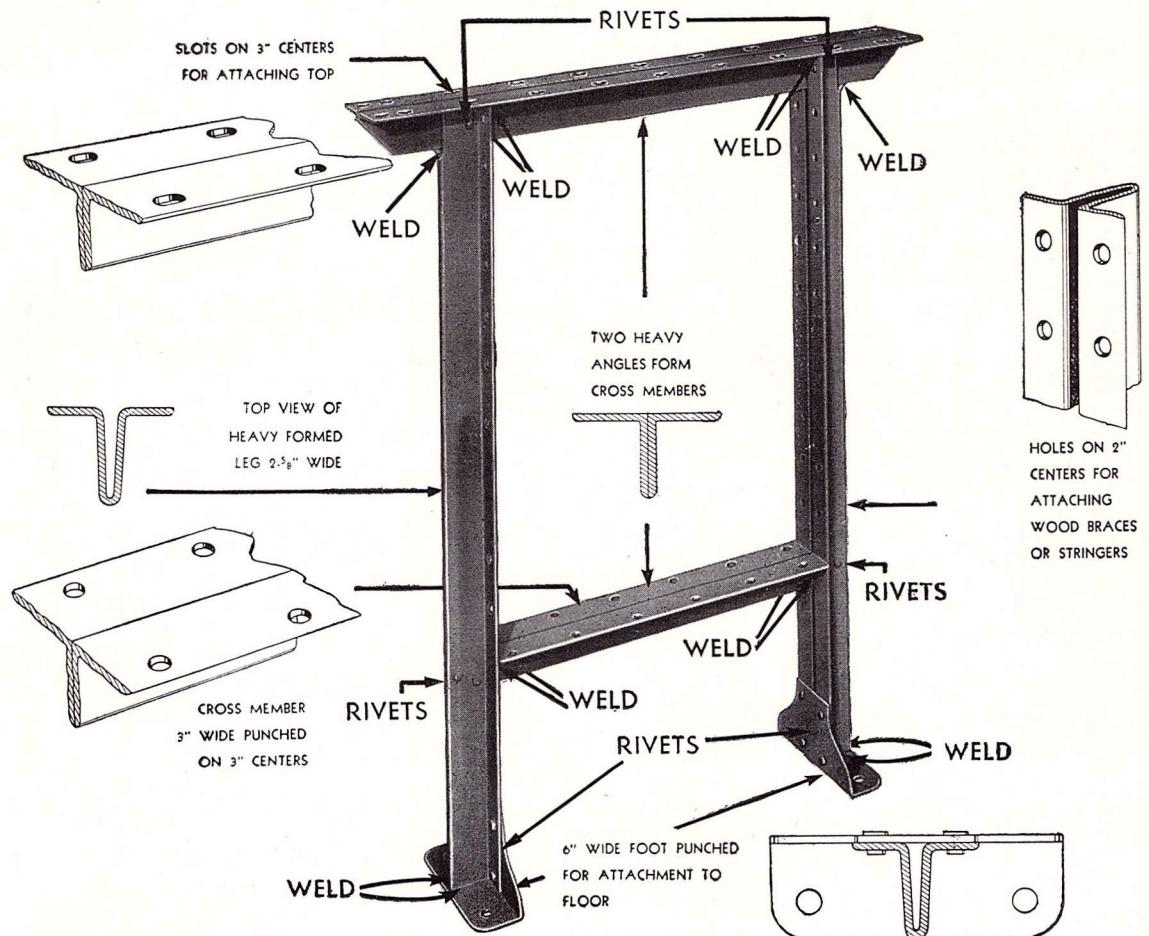

Lyon Steel Bench Legs provide support for:

- Wood and steel top benches
- Wood tables
- Machine mountings
- Bulk storage platforms

Heavy "T" formed steel upright members, $2\frac{5}{8}$ " wide by 2" deep, and cross members riveted and welded together. Top and bottom cross members

are punched every 3 inches on both edges for ready attachment of the top and shelf. Upright members are punched for attaching wood or steel stringers.

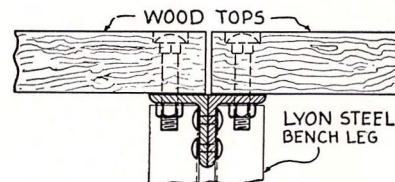

Exclusive features of Lyon Bench Legs are: (1) both riveted and welded assembly, (2) heavy steel sections, (3) maximum rigidity, (4) reversible front to rear, (5) no "flared" foot tripping hazard, and (6) 24 square inches of floor bearing surface per leg.

LEFT: Lyon Steel Bench leg used with wood top, stringer and shelf.

	SIZES	
No. 2401-11	28" deep	32 1/4" high
No. 2401-12	34" deep	32 1/4" high

Legs are finished in tough, Lyon Green baked enamel. Shipped completely assembled.

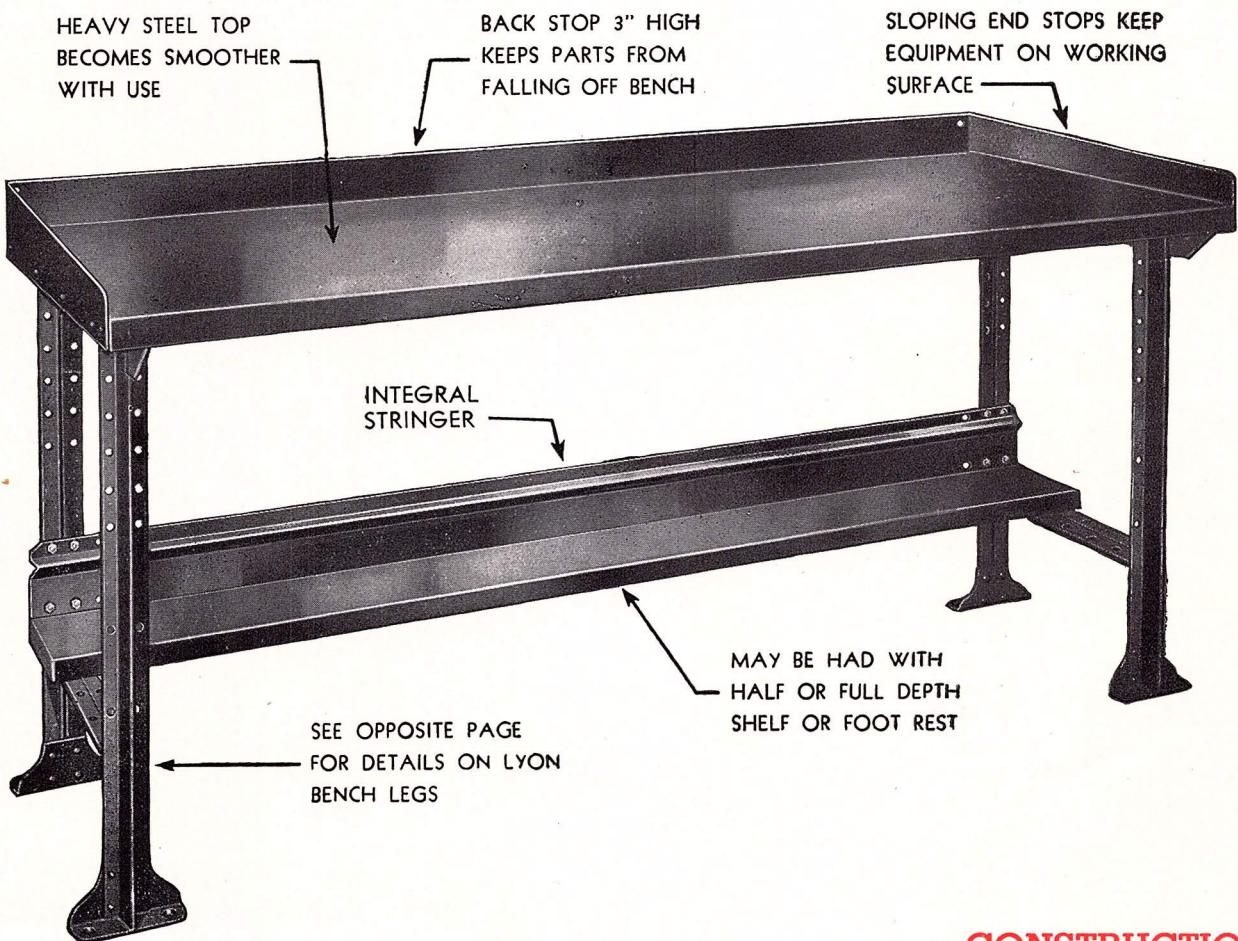

ABOVE: A single bench leg is used for two adjoining wood tops. Steel tops may be joined the same way.

WORK BENCHES

Typical of the engineering and planning built into ALL Lyon Products is the Lyon Work Bench. Research has developed what is necessary to do the job and Lyon has proved itself through 40 years of service.

Lyon heavy duty steel benches are suitable for every type of bench work and ideal for factories, vocational schools, the home workshop and as packing benches. In the factory they are used for (1) light and heavy machine work, (2) on production lines, (3) for die making, (4) on assembly lines, (5) in the toolroom, (6) for layout and cutting work.

Advantages of Lyon Steel Benches are many but these are most important:

- Longer life—the steel bench top improves with use.
- Top will not crack, splinter, or gouge, reducing employee injuries and bench replacements.
- Steel top will not become oil soaked—reducing fire hazards.
- Entire bench is easily cleaned.
- There is no maintenance cost.

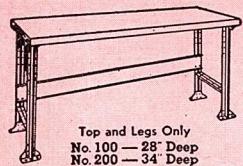

CONSTRUCTION DETAILS

Lyon Bench Tops are fastened to the legs through 2"x4" specially designed attachment blocks to provide a cushion and to deaden sound. Channel shaped steel stringer assures rigidity when no shelf is used. Edges of the heavy steel top are flanged down 1 $\frac{1}{4}$ " and back 1 $\frac{1}{2}$ " on both front and rear edges for greater strength and freedom from rough edges. Finished in Lyon Green baked enamel. Shipped knocked down.

16 sizes and 144 assemblies. Available from stock in 28" and 34" depths; and 36", 42", 48", 60", 72", 84", 96", 108", and 120" lengths. All benches 34"

high. BENCHES 96" LONG AND OVER FURNISHED WITH THREE LEGS. Shipped knocked down. (See page three).

Order benches by number and specify length desired.

PORTRABLE WORK BENCHES

A time-saver for maintenance men. Also meets the demands of flexible production lines.

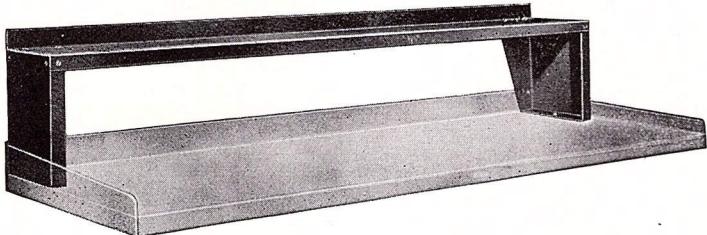

The stationary, semi-steel wheel casters on one end and wheelbarrow type handles on the other make it possible to take this Lyon Bench right to the job. Handles slide under the bench when not in use. In addition to the uses for the standard bench, the portable bench is ideal for (1) millwrights and maintenance men, (2) mobile production and assembly lines, and (3) inspectors.

Portable benches available in 28" depths and 36", 42", 48", 60", 72", and 84" lengths only. When ordering add the letter "P" to the number to designate that the Portable Bench is desired.

Example: A No. 100 bench in a portable model would become a No. 100-P. Finished in Lyon Green baked enamel. Shipped knocked down.

No. 3100-P Bench with
No. 480-15 Drawer

- Keep tools, tool box, and parts off the working surface but within easy reach.

BENCH RISERS

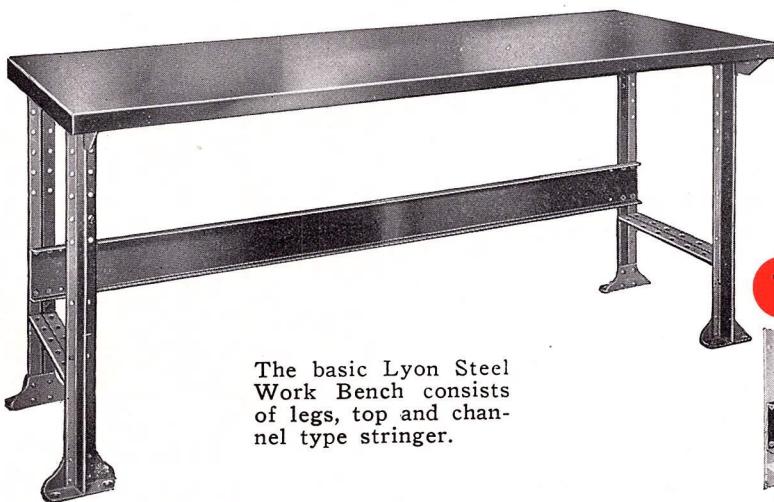

Consists of one piece top and two standards. Storage surface of riser (12" above bench top surface) is 10½" deep with 2" back stop. May be had in five and six foot lengths. Riser bolts to bench top. Finished in Green baked enamel. Shipped with uprights detached.

No. 2410-11—60" long. No. 2410-12—72" long.

- Riser is rigidly braced and backstop keeps equipment from falling off.

BENCH ACCESSORY EQUIPMENT

The basic Lyon Steel Work Bench consists of legs, top and channel type stringer.

1 The Channel type stringer, 5" wide with 1" flange at top and bottom, is part of the basic bench unless shelves are ordered. When shelves are used, stringer and shelf is made in ONE PIECE.

2 Heavy gauge half shelf and rib-reinforced stringer are made from one piece of steel—an exclusive Lyon feature. Attached stringer provides backstop for shelf. Shelf bolts to leg cross member and stringer bolts to back upright member. Bench top and shelves are same length.

3 Heavy gauge full-depth shelf and rib-reinforced stringer are made from one piece of steel—an exclusive Lyon feature. Attached stringer provides backstop for shelf. Shelf bolts to leg cross member. Bench top and shelves are same length.

4 Back stop extends 3" above bench top surface. Bottom is flanged to fit under bench top and top edge is folded back into a $\frac{1}{2}$ " flange for strength and finished appearance. End stops taper from 3" high at rear to $1\frac{1}{2}$ " at the front.

5 Illustration shows regular bench drawer which is available in 4 sizes. Two and three drawer units available. (See next page for details).

6 Formed steel tube $1\frac{5}{8}$ " in diameter bolts to lower cross members of bench legs. Available in all regular bench lengths.

The accessory parts shown on this page are used to adapt the basic Lyon Bench to individual requirements. Each has been designed to fill a need as indicated by long experience. All accessories finished in Lyon Green baked enamel.

THREE DRAWER UNIT

TWO DRAWER UNIT

For two shift operations the two drawer unit can be furnished on Lyon Steel Benches, 24x24x34 Tool Stands, Shop Desks and used under counters. Attached to wood top benches with wood screws. Shipped set up.

No. 2375-11—21 $\frac{3}{8}$ " wide, 19 $\frac{3}{4}$ " deep, 13 $\frac{5}{16}$ " high.

Note: Adjustable attachment angles furnished.

Drawer trays and flat key locks extra and must be specified.

Left:

Three Drawer Unit on Lyon Bench with full depth shelf.

Right:

Three Drawer Unit on Lyon 24x24x34 Tool Stand.

Two Drawer Unit attached to Lyon Standing Type Desk.

WELDING BENCHES

ARC WELDING BENCH

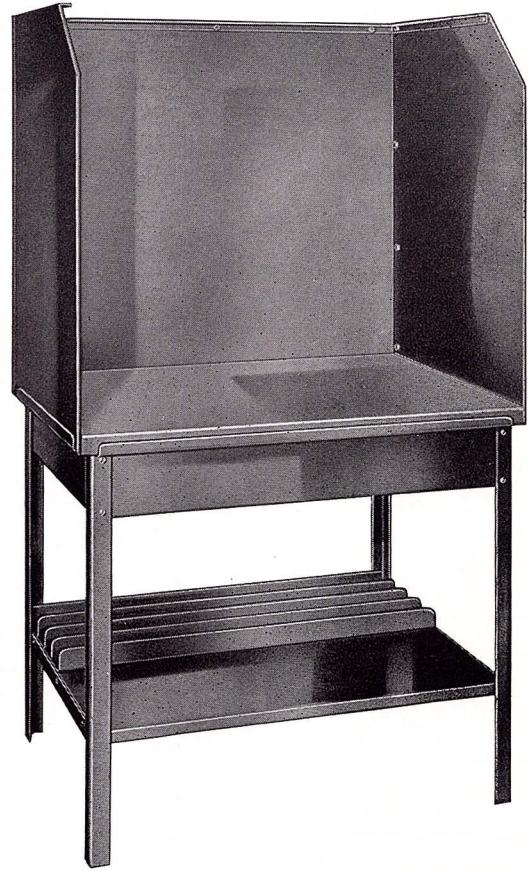

(Patent Applied For)

Bench surface made of 10 gauge steel, is 33" above the floor. Shelf back stop and four 32" dividers form four compartments 3" wide for welding rods. Front of shelf is handy for welding blocks. May be equipped with same single drawer as used on Lyon Work Benches.

Legs and end cross members are welded into a single unit for easy erection and positive rigidity. Front and back cross members and center brace are bolted to the leg sections. Shield 35" high sets inside flange and bolts securely. Bench top fits inside shield — resting on the bottom flange. All edges of the shield are hemmed and top edge is reinforced with an angle frame.

Finished in Lyon Green baked enamel. Shipped knocked down.

No. 2300-12 Bench—37" wide, 28" deep, 66½" high overall.

GAS WELDING BENCH

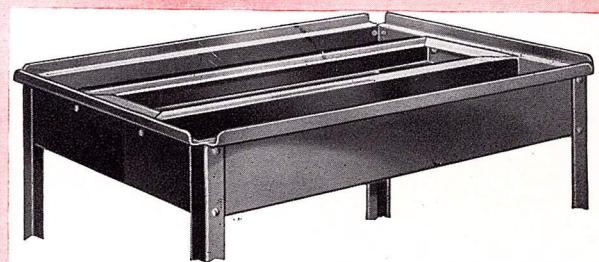

Patent No. 2310904

The top of the Lyon Gas Welding Bench consists of the outside frame and 34½" x 11¼" rectangular frame (as illustrated below) made of 2" steel angle bolted between the end uprights, making room for twenty-four 9" x 4½" x 2½" standard fire bricks (bricks not furnished — available at local yards). Shelf has 4 compartments 3" wide for welding rods. May be equipped with same single drawer as used on Lyon Work Benches. Finished in Lyon Green baked enamel. Shipped knocked down.

No. 2300-11 Bench—37" wide, 28" deep, 34" high.

- ★ Legs and end cross members are welded into a single unit for easy erection and positive rigidity.
- ★ Shelf equipped with compartments for welding rods — space for welding blocks.
- ★ Welded angle frame bolted between top cross members increases strength.

Closeup showing location of angle steel center frame. Center row of bricks rests on center frame, outside rows rest on center frame and front and back cross members.

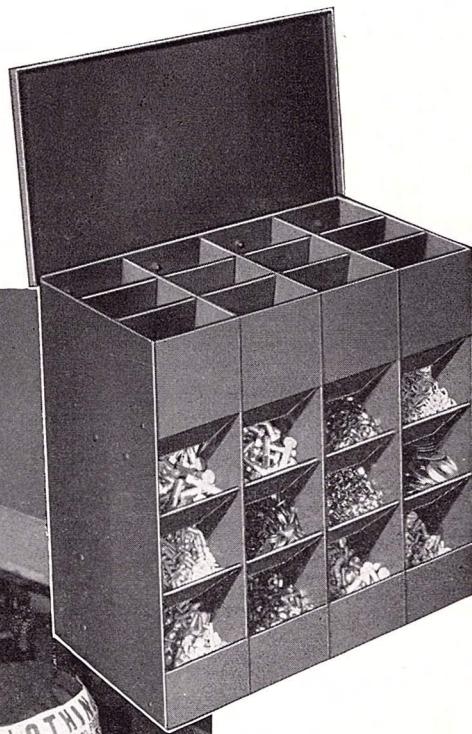

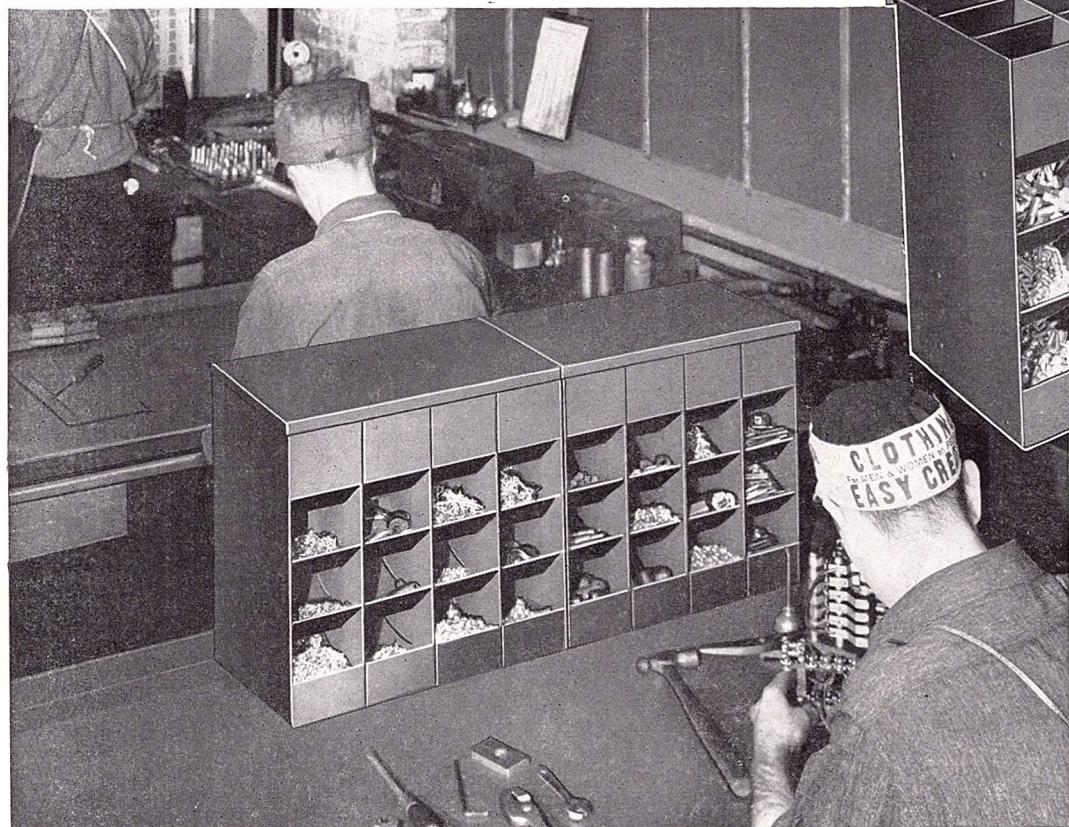

ASSEMBLER'S BENCH BIN

(Patent Applied For)

Only one square foot of bench area is required by the Lyon Assembler's Bench Bin to store generous supplies of 12 different parts. Hoppers (filled from the top) are self-feeding and keep parts right at the fingertips without poking and prying. No scattered, misplaced, mixed or dirty parts.

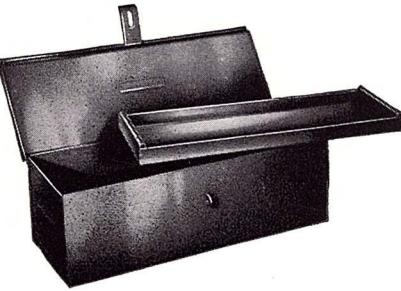

SIZE

No. 2963— $16\frac{1}{4}$ " wide, $9\frac{1}{4}$ " deep, 15" high—overall. Hopper front openings are each 4" wide and 3" high. Loading compartments at top are 4" wide and 3" deep.

Uses of the Bench Bin include: (1) bench assembly lines, (2) in stockrooms for issuing small parts, and (3) as retail counter merchandiser. Cover is attached with a continuous "piano" hinge and back flange acts as a stop when loading. Finished in Lyon Green baked enamel.

TOOL BOXES

An extra heavy duty box that protects tools and furnishes a practical carrying case. Full-length piano type hinge. Strong padlock attachment. Finished in Lyon Green baked enamel. Tray is extra, must be specified.

SIZE

Box Number	L.	D.	H.	Tray Number
484-11	18"	6"	6"	474-11
484-12	19"	7"	6 $\frac{1}{2}$ "	474-12
484-13	22"	7"	6"	474-13

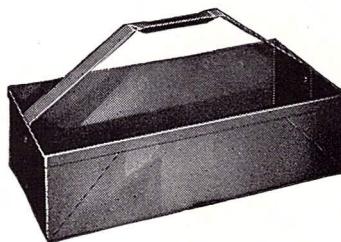

Handy for carrying tools to the job. One piece construction. Ends overlap sides and are clamped under $\frac{1}{2}$ " hem in addition to being welded. Handle is riveted in place. Finished in Lyon Green baked enamel.

SPECIFICATIONS

17 $\frac{1}{2}$ " long, 8 $\frac{1}{2}$ " wide, 4 $\frac{1}{2}$ " high — overall height including handle is 8 $\frac{1}{2}$ ".

TOOL TRAY

No. 230-13

DRAWING TABLE

No. 2330-11

The Lyon Steel Drawing Table is designed to accommodate 4 drawing classes per day. The student puts away his drawing materials at the table, reducing between-class traffic. Design and dimensions have been developed by actual tests under the supervision of practical school authorities.

Bottom opening in locker provides storage for standard drawing boards, up to and including 20" x 24 $\frac{1}{2}$ ". Shelf at top is used for drawing instruments and supplies. Padlock hasps permit doors to be securely locked. Lockers numbered from one to four. Finished in Lyon Green baked enamel.

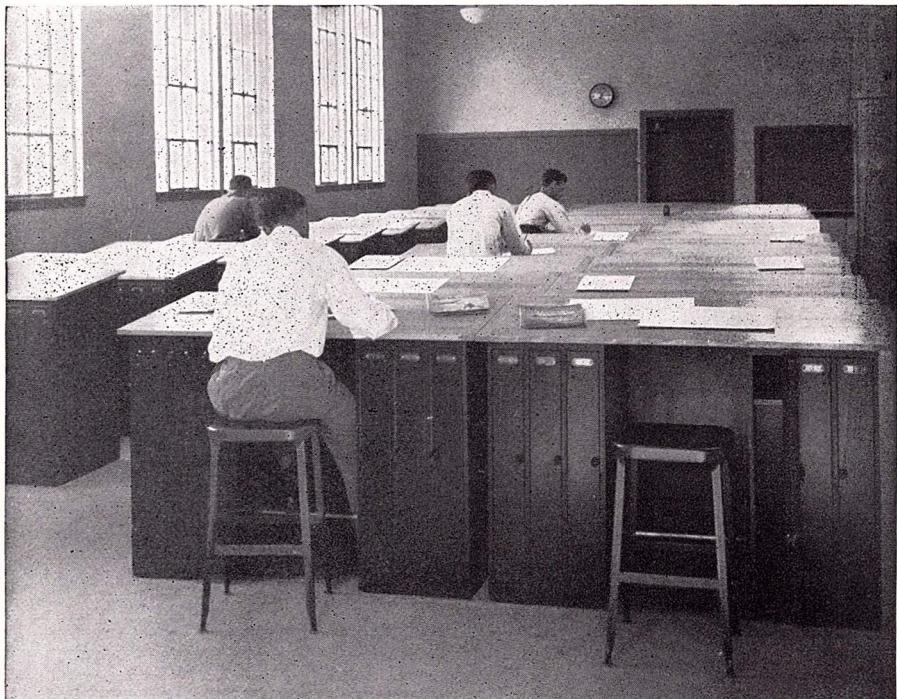

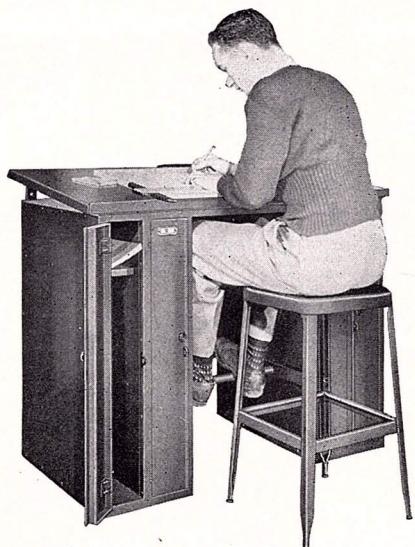

Flange on front edge holds drawing board in position. Piano type hinge running full width of top assures continuous perfect alignment and ease of operation.

SPECIFICATIONS

Table Top Surface: 45 $\frac{1}{2}$ " wide, 26" deep.

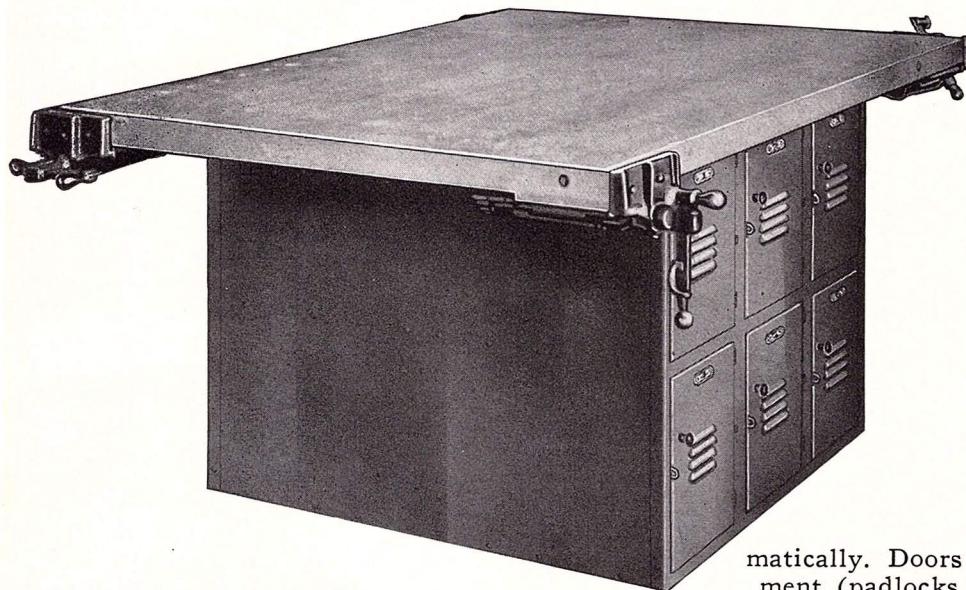

Locker Size (overall): 42 $\frac{1}{2}$ " wide, 24" deep, 36" high.

Lockers (each): 4 $\frac{1}{2}$ " wide, 24" deep, 32 $\frac{7}{8}$ " high. (Opening for drawing board 26 $\frac{1}{2}$ " high).

WOOD WORKING BENCH

Wood Working Bench base is absolutely stable. The bench illustrated has working space for four persons (one at each corner) and storage space for 12 persons to accommodate three classes or shifts per day. Available for use against the wall with lockers on one side only. Springs close doors automatically.

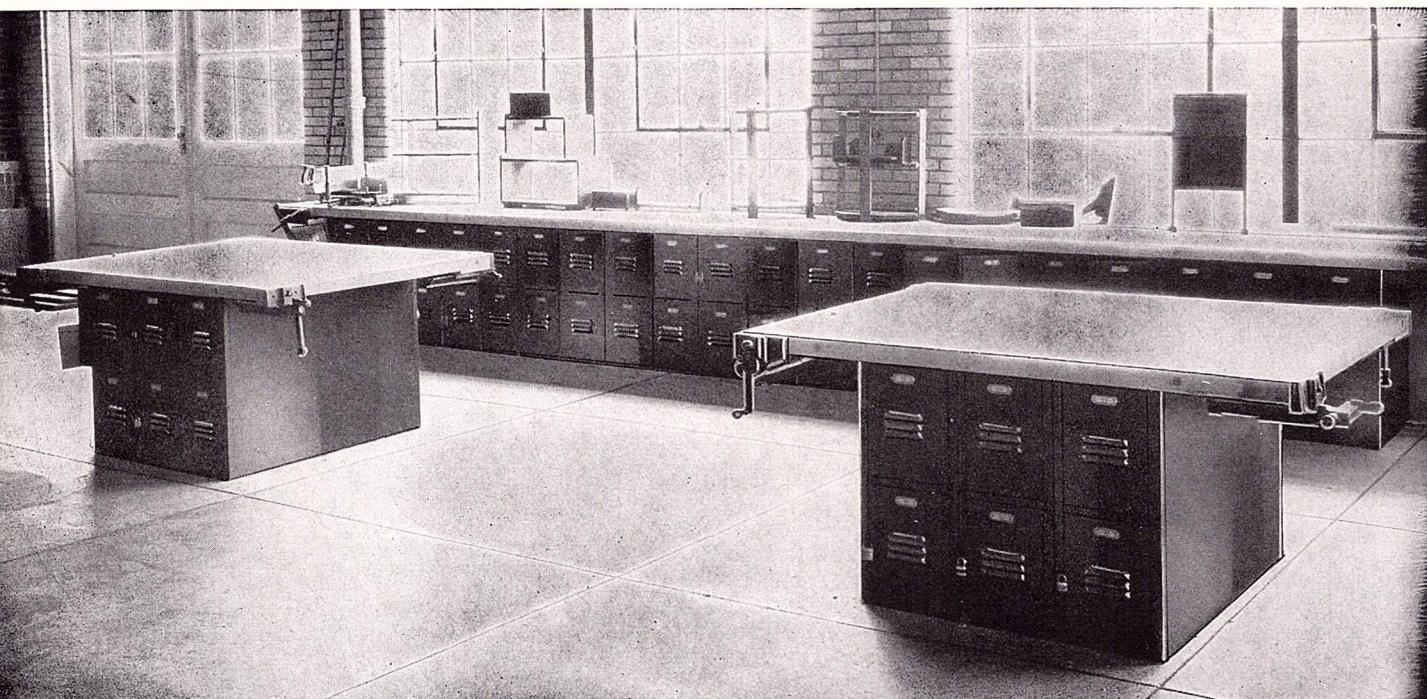

The Lyon Wood Working Bench offers Vocational Schools and Wood Shops three definite advantages:

1. Systematic storage under the bench and out of the way.
2. Tools and equipment are used and stored at one location.
3. Eliminates congestion at storeroom.

Doors equipped with padlock attachment (padlocks not furnished). Built-in flat key locks are extra and must be specified. Vises not furnished by Lyon. Locker openings are 12" wide, 21" deep, and 15" high. Overall height is 30" plus wood top (2 $\frac{1}{4}$ "). Lockers finished in Lyon Green baked enamel. Bench may be shipped set up or knocked down.

SPECIFICATIONS

No. 8429-11—Set Up.
No. 8429-12—Knocked Down (Single Face) 36" wide, 21" deep, 30" high. Wood top: 64" wide, 28 $\frac{1}{2}$ " deep, 2 $\frac{1}{4}$ " thick.
No. 8429-13—Set Up.
No. 8429-14—Knocked Down (Double Face) 36" wide, 42" deep, 30" high. Wood top: 64" wide, 50" deep, 2 $\frac{1}{4}$ " thick.

SHEET METAL WORK BENCH

The Lyon Sheet Metal Work Bench furnishes a large SOLID working area and shelf storage area for metal sheets and stakes. Heavy duty top, 60" wide and 40" deep, is mounted on Lyon Bench Legs which follow the same design as the legs used on Lyon Work Benches and described on page 2. Stake Plates 8" x 30" are mounted flush on both sides of the bench and 1½" x 2" x ⅛" angles protect the edges of the top. Wood top is made of hard maple or birch with natural finish.

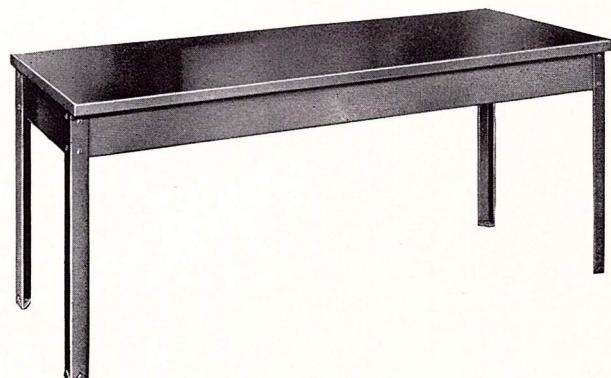

Leg uprights and cross members are riveted and welded into a single unit. Shelves are bolted to cross members and stringer on bottom shelf is bolted to the back leg uprights for continued rigidity. Steel parts are finished in Lyon Green baked enamel. Shipped knocked down.

SPECIFICATIONS

Bench No. 2395-11—60" wide, 40" deep, 34½" high. Wood top (maple or birch) is 2¼" thick. Openings between each shelf and flange of the shelf above is 7".

STEEL UTILITY TABLES

Lyon Steel Utility Tables are designed for "medium duty" requirements such as classrooms, shipping and packaging departments, light assembly work, mailing departments, receiving departments, shop offices and cafeterias. May be had with steel top or with linoleum top and brass binding strips. Sturdily constructed with 2⅛" x 2⅛" angle steel legs. Finished in Lyon Green baked enamel. Shipped knocked down.

No. 1850 TABLES

Two drawers—grooved key locks are extra and must be specified. Available with steel or linoleum top.

SIZES

No.	Top	Length	Depth	Height
1850- 523	Steel	60"	30"	30"
1850-1523	Linoleum	60"	30"	30"
1850- 527	Steel	72"	30"	30"
1850-1527	Linoleum	72"	30"	30"
1823- 523	Steel	60"	30"	30"
1823-1523	Linoleum	60"	30"	30"
1823- 527	Steel	72"	30"	30"
1823-1527	Linoleum	72"	30"	30"

No. 1823 TABLES

No drawers. Available with steel or linoleum top.

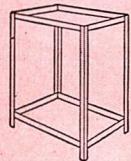

TOOL STANDS

Lyon Tool Stands have many uses in every factory. Most common are:

- Tool and work stands around production machines.
- Mountings for small tools.
- Toolroom.
- Parts containers for assembly lines.
- Part and tool transporters for maintenance men.
- Equipment carriers for inspectors.
- Stock picking and transportation.

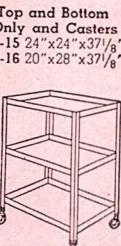

Drawer can be locked to guard against petty thievery — regularly equipped with padlock hasp (padlock not furnished). Flat key locks extra and must be specified. Stands are sturdily built of heavy gauges and shapes and securely riveted at the factory. Bottom tray has 4 rivets at each corner to withstand vibration. Finished in Lyon Green baked enamel. Shipped set up. Steel Casters are swivel type, wheels are $2\frac{1}{2}$ " in diameter with $\frac{3}{4}$ " tread.

TOOL TOTERS

The Lyon Tool Totter serves the same general purposes as the Lyon Tool Stand. Drawer "stops" prevent accidental removal of drawers and damage to contents. Padlock hasp for locking both drawers at one time—padlock not furnished. Top tray and shelf have $1\frac{1}{2}$ " flange. Steel swivel casters are $2\frac{1}{2}$ " in diameter with $\frac{3}{4}$ " tread. Finished in Lyon Green baked enamel. Shipped set up.

SINGLE DRAWER TOTER

Single Drawer Toters are the same as the tوتر illustrated except that they have only one drawer at the top.

Two Models

No. 2983-11 (illustrated above) with padlock attachment—no padlock.
No. 2983-12 Single drawer model with padlock attachment—no padlock.

SIZE

18" wide, 24" deep, $34\frac{1}{2}$ " high overall. Drawers 15" wide, $23\frac{1}{2}$ " deep, $4\frac{5}{8}$ " high.

TOOL CABINET-BENCH

The Lyon Hanging Tool Cabinet may be hung on a wall close to the job. Punched on 1" centers for pegs. Padlock attachment (padlock not furnished). Shelf, tool pegs, and wrench socket tray extra and must be specified.

SIZE

24" wide, 12" deep, 33" high.
No. 2973—Cabinet (no accessories).
No. 903-224—2½" Tool Peg.
No. 2978-13—Shelf.
No. 2976-13 — Socket Tray (2" wide, 10½" long, 1½" high).

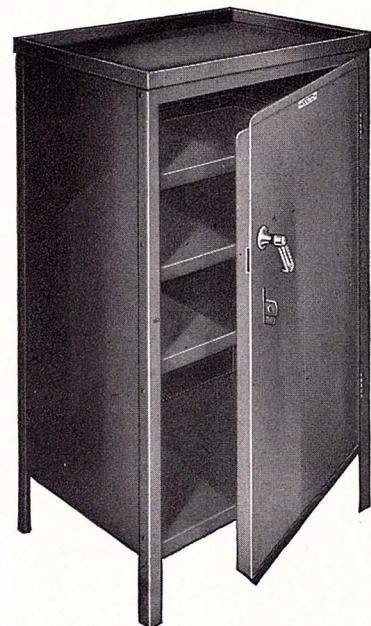

The Lyon Tool Cabinet-Bench at the right is a convenient piece of equipment for it furnishes a working surface as well as space to lock up valuable tools, dies, precision instruments, drawings, etc.

Fitted with three stationary shelves in addition to the top and bottom trays—it has 315 square inches of top working area and approximately 1260 square inches of shelf area under lock and key.

Top tray is flanged to prevent material from falling off. May be had with padlock hasp or flat key lock. Finished in green baked enamel. Shipped set up.

SIZES

21¼" wide, 15¼" deep, 34" high. (With casters 37⅛" high).
No. 2144-11 with padlock attachment (lock not furnished).
No. 2144-12 with flat key lock.
No. 2144-13 with padlock attachment (padlock not furnished) and casters.
No. 2144-14 with flat key lock and casters.

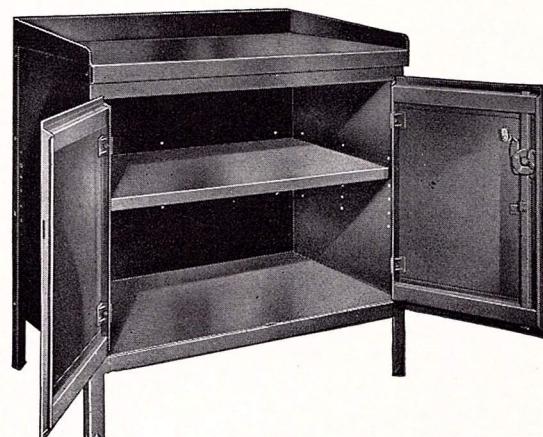

The Lyon Tool Cabinet showing location of shelves.

MACHINE TOOL CABINET-BENCH

The heavy steel top on the Lyon Machine Tool Cabinet-Bench makes a sturdy mounting for small grinders, and vises. Bottom shelf and adjustable center shelf furnish 12 square feet of storage area protected by double swinging doors with 3-point locking device. Center shelf is adjustable on 1½" centers. Cadmium plated handle, padlock attachment (padlock not furnished) or built-in flat key lock. Finished in green baked enamel. Shipped set up.

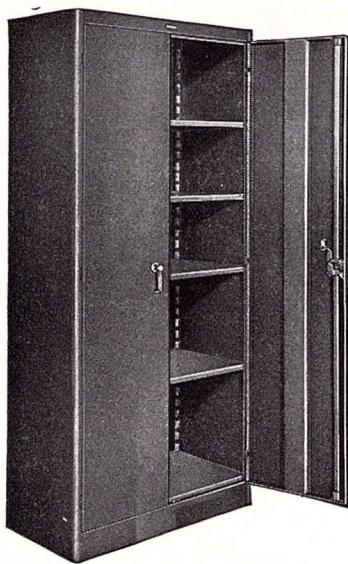

SPECIFICATIONS

No. 2345-11—36" wide, 24" deep, 34" high (37" high including back stop). Bottom shelf 7½" above floor. With padlock attachment.
No. 2345-12—Same Cabinet with built-in flat key lock.

CABINETS

STORAGE CABINETS

Steelart Storage Cabinets are equipped with four flat shelves, adjustable on 2" centers. For extra heavy storage use the cabinet shelf reinforcements described at the bottom of this page.

SIZES

Number	Width	Depth	Height
F-910	36"	18"	78"
F-911	36"	24"	78"

Lyon Steelart Cabinets radiate "modern styling" because of their streamlined design. Front edges are rounded, and exclusive construction eliminates bolt heads on the front and sides. Tamper-proof, grooved key lock. Attractive chrome handle and 3-point locking device. Finished in Lyon Green baked enamel. Shipped set up.

SINGLE DOOR

Janitor's Cabinet — (illustrated) broom and mop compartment, one full shelf, four $\frac{3}{4}$ shelves. No. F-935—24" wide, 24" deep, 78" high.

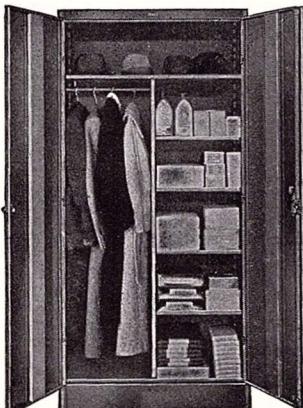

Storage—4 adjustable full width shelves.

W.	D.	H.
No. F-920—24"	18"	66"
No. F-921—24"	18"	78"
No. F-922—24"	24"	78"

Wardrobe—one full width wardrobe shelf and coat rod.

W.	D.	H.
No. F-924—24"	18"	66"
No. F-926—24"	18"	78"
No. F-927—24"	24"	78"

COMBINATION

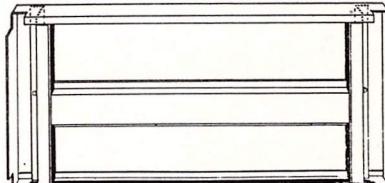

Combination wardrobe and storage cabinet with one wardrobe shelf and coat rod; partition, and four half shelves adjustable on 2" centers.

SIZES

Number	Width	Depth	Height
F-918	36"	18"	78"
F-919	36"	24"	78"

CABINET SHELF REINFORCEMENTS

Where cabinet shelves are loaded heavily we recommend the use of Lyon Shelf Reinforcements. Reinforcements are "H" shaped with cross piece running lengthwise of the shelf. Uprights of the "H" support the ends of the shelf. May be added to Storage Cabinet shelves at any time.

SIZES

- No. 1242A14 for 36" x 18" shelves.
- No. 1242A15 for 36" x 24" shelves.

UTILITY CABINETS

500 Series Cabinets are "specials" in price, value, strength and utility. Provide exceptionally compact and safe storage or wardrobe space. Rigid angle steel frame, reinforced doors, 3-point locking device, flat key lock, and attractive handle. Finished in Lyon Green. Shipped set up.

SIZES

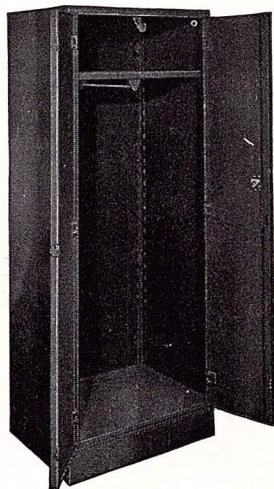

No. F-561 Storage Cabinet four adjustable shelves. 24" wide, 18" deep, 64" high—overall. Shelves adjustable on 2" centers.

No. F-564 Wardrobe Cabinet one shelf and coat rod. 24" wide, 18" deep, 64" high—overall.

Extra Shelves

For F-561 Cabinets
No. 8421-P14 — 24" x 18"

For F-564 Cabinets
No. 8421-P13 — 24" x 18"

BLUEPRINT CABINETS

For flat storage of blueprints, drawings, tracings, maps, charts, large papers and photographs.

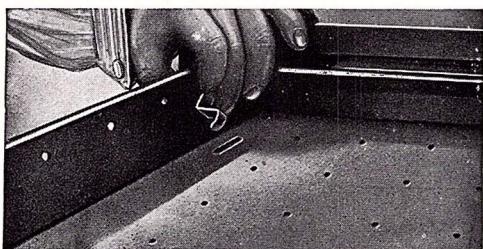

Cabinet has a rigid frame for continuous perfect alignment of drawers. Patented stop prevents drawers from being accidentally pulled out and spilled, yet permits removal by slight pressure on the automatic catch. May be provided with a large variety of drawer compartments. Finished in Lyon Green baked enamel.

SIZES

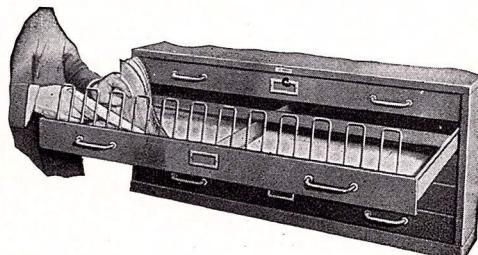

Cabinet No.	Width	Depth	Height
2225-11	28"	21 $\frac{3}{4}$ "	17"
2225-12	40"	27 $\frac{3}{4}$ "	17"
2225-13	44"	33 $\frac{3}{4}$ "	17"
2225-14	52 $\frac{1}{6}$ "	40 $\frac{1}{4}$ "	17"

Closed Bases 6" high and Sanitary (leg) Bases 12" high available for all the above sizes.

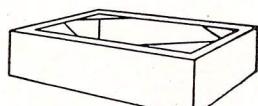

Cabinets listed have plain drawers—divider arrangements and prices on application.

The drawer stop prevents accidental removal of the drawers but is easily released with the finger.

The hinged paper weight and protecting hood holds papers flat without interfering with their insertion or removal.

Closed Base
6-Inch Height Only

Sanitary Base
12-Inch Height Only

STEEL STOOLS

Basic stool 22" high with steel seat, forged steel glide feet and one channel brace foot rest between the legs. Foot rest is 15" below top of stool.

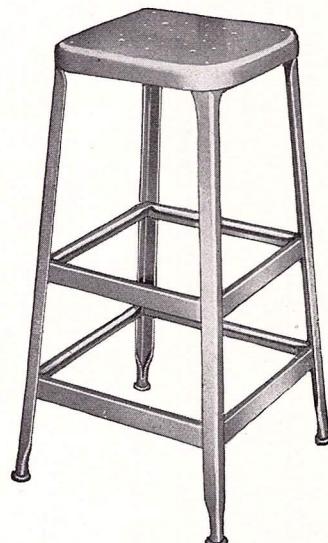

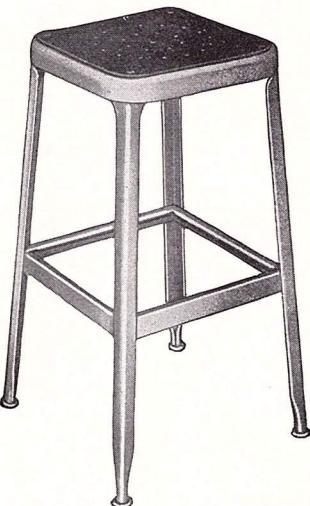

A 26" stool with durable pressed wood seat applied over the steel seat. This construction makes possible the advantages of a wood seat without sacrificing the strength of the steel seat. Pressed wood seat will not crack, break or splinter. See next page for description.

This 22" stool is equipped with composition casters. Casters do not sacrifice stability — stool will not roll from under a person under normal use but may be readily pushed back when a worker rises. Description on next page.

FOR EVERY REQUIREMENT

Lyon Stools are available in seven heights and 112 models. Basic stools are made entirely of steel and finished in high grade baked enamel for long life and attractive appearance — for every commercial and industrial use. Basic stool has steel seat and steel glide type feet. It may be equipped with accessories shown on next page. Stools 28" and 30" high have two channel braces between the legs.

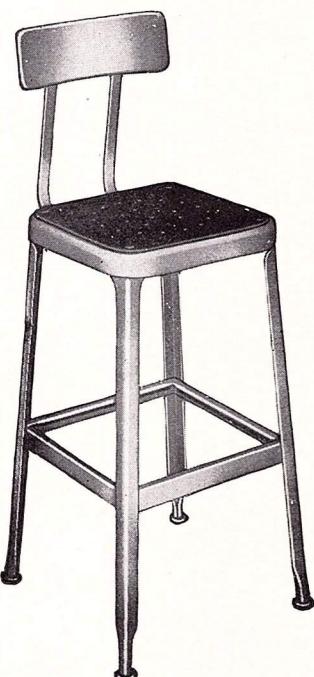

Basic stool 30" high illustrating two channel cross braces as used on 28" and 30" stools. Top brace is always 15" below the seat to assure a comfortable foot rest position.

This 26" stool is equipped with the No. 95-12 adjustable back and No. 9-280 pressed wood seat. Back may be applied to all stools, with or without wood seat. Description on next page.

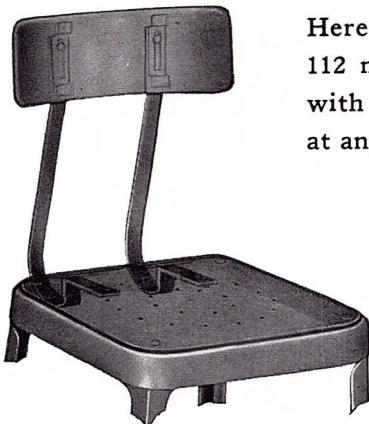

EXCLUSIVE LYON FEATURES

1. All welded, non-breakable construction.
2. Made from round edge steel band with no rough edges to snag or tear hose and other clothing.
3. Unusually large, comfortable seat 14" square with rounded corners.
4. Tapered legs insure safety against tipping.
5. 112 models to choose from.
6. Strong channel brace providing a comfortable foot rest located at a uniform distance below seat for all heights.
7. Long life pressed wood seat applied over steel for strength.
8. All accessories interchangeable—may be attached any time to any model.

STOOL ACCESSORIES

Here are the accessory parts used to make up the 112 models of Lyon Stools. Stools may be ordered with accessory parts attached, or they may be added at any future time.

No. 95-12—Steel Back—13" x 4½", used on all stools. Attaches to face of steel seat and flanged edge. Back rest adjustment range is from 8" to 10" above seat measured from bottom of back rest. (Seat and back phantomed to show method of attachment and adjustment.)

Forged steel, glide type foot 1⅛" in diameter as it appears fitted into the curved bottom of the leg. Rounded bottom assures easy sliding without damage to floors.

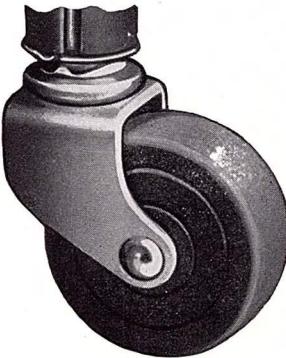

No. 9-281 Rubber Foot (1⅓" in diameter, 1⅛" high) fits over the regular steel foot. Eliminates metallic sound and slippage. Easily attached or removed.

No. 9-282 Rubber Foot with steel glide impacted in rubber making it easy to slide stool and eliminating metallic sound. Dimensions same as No. 9-281.

No. 9-280—Pressed Wood Seat—13⅜" square and 1⅛" thick with corners rounded on a 2⅓" radius. Wood seat fits flush with face of steel seat and is held in tension against the slightly dished surface of the steel seat with special flush-head bolts. Pressed wood is tough—has no grain—will not warp, crack, or absorb oil or moisture. Sets back from seat edge to prevent chipping.

No. W558A Caster—attached by removing standard steel foot and inserting No. 53 round peg of caster in base of leg. Caster wheel is 1⅜" in diameter and increases height of stool 2".

(STOOLS SHIPPED BUNDLED—NOT PACKED OR CRATED)

SHOP DESKS

**STANDING TYPE
No. 2131-12**

The all-welded steel construction provides a smooth, firm surface on which to work and makes it possible to keep important papers under lock and key. Drawer (24" x 28" x 3½") has roller bearing slides, brass handles and built-in lock. Two hooks on right side. Use Lyon 28" or 30" stool.

SPECIFICATIONS

34½" wide, 30" deep, 53" high (overall), 43" high at front of sloping top. Has half-shelf adjustable in height on 1½" centers.

CABINET DESK

The Lyon Cabinet Desk is the same as the shop desk described above except that the desk top is mounted on a cabinet type base.

Cabinet doors are equipped with a three-point locking device, flat key lock, and cadmium plated handle. Opening between bottom shelf and desk front is 26" high and 29¼" wide with doors open wide. Center shelf is 14" above bottom shelf.

Front legs and cross members are welded into one unit. Door hinges riveted to legs. Back legs and panel are one welded piece. Side panels, shelves and desk are bolted to front and back sections. Finished in Lyon Green baked enamel. Shipped set up.

SPECIFICATIONS

No. 2131-16—Cabinet Desk—34½" wide, 30" deep, 53" high (overall), 43" high at front of desk. Cabinet is 32" wide and 28" deep.

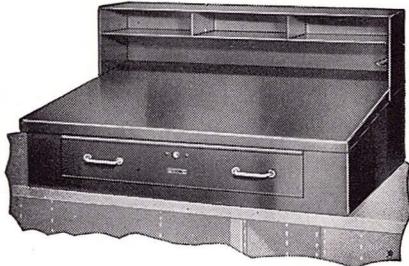

**DESK-HIGH TYPE
No. 2131-13**

Same as Standing Type Desk except that it is just the right height to work while sitting on a standard height office chair or 18" Lyon Stool.

SPECIFICATIONS

34½" wide, 30" deep, 41" high (overall), 31" high at front of desk.

COUNTER TYPE No. 2131-14

When used on a counter or bench, top of desk is at convenient height to work while standing or seated on a stool.

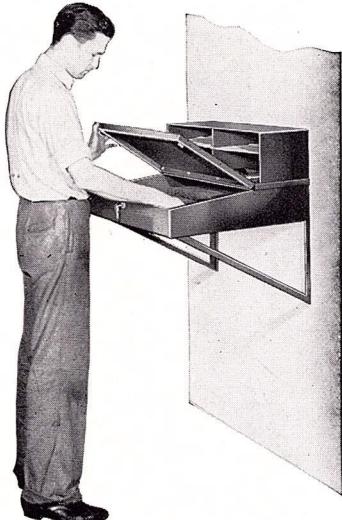

SPECIFICATIONS

34½" wide, 30" deep, 17" high (overall).

LYON

WALL DESKS

(Patent Applied For)

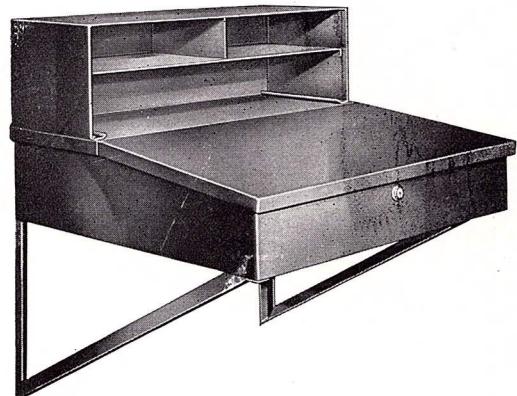

Lyon Wall Desk in use.

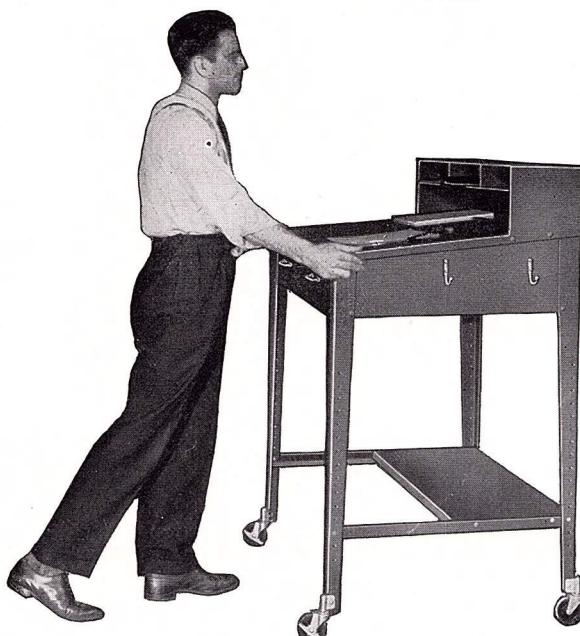

The Lyon Wall Desk may be attached at any handy wall space, building column, or the end of a rack of shelving. Used by inspectors, timekeepers and checkers.

Has a $24\frac{1}{8}$ " x 14" working surface, large storage compartment and three open compartments across the back of the desk. Equipped with a pencil tray on each side. Grooved key lock with two keys.

Finished in Lyon Green baked enamel. Shipped set up with supporting brackets detached.

No. 2131-17 Wall Desk— $24\frac{1}{8}$ " wide, $23\frac{1}{2}$ " deep, 13" high, plus attachment bracket which is 12" high. Attachment bracket, made of $\frac{7}{8}$ " x $\frac{7}{8}$ " angle steel, bolts to desk bottom.

PORTABLE DESK

No. 2131-15

The Lyon Portable Desk has all the features and uses of the regular Standing Type Desk (No. 2131-12) plus the advantage that it can be taken right to the job. The portable feature makes the desk especially useful to inspectors and time study men who are required to carry papers, books, rules, etc. from job to job.

Casters are swivel type with composition wheels 3" in diameter with $\frac{3}{4}$ " tread. Front casters (nearest user) are equipped with locking lever to hold desk stationary at the job. Brakes applied or released by slight foot pressure.

SIZE

$34\frac{1}{2}$ " wide, 30" deep, 53" high (overall), 43" high at front.

SORTING RACK

A jack-of-all-trades is the Lyon Adjustable Sorting Rack which is used for:

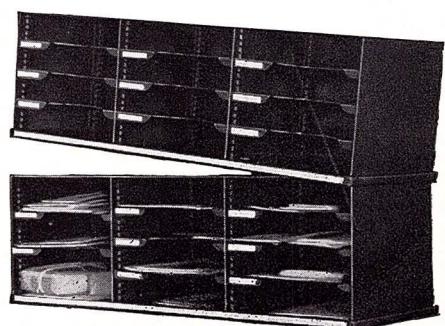

MAIL SORTING
SHIPPING PAPERS
JOB TICKETS
TEMPORARY FILING

CATALOG STORAGE
MAGAZINE STORAGE
RECORD STORAGE
PAPERS AND BOOKS

SANDPAPER STORAGE
EMERY PAPER STORAGE
PAPER PATTERN STORAGE
SMALL TOOL STORAGE

SIZE

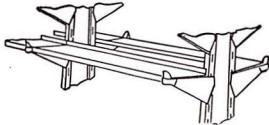

No. 2285-1— $34\frac{1}{4}$ " wide, $11\frac{1}{2}$ " deep, $10\frac{5}{8}$ " high. Shelf width $10\frac{13}{16}$ ". Top rack (in illustration) raised at one end to show how they stack securely.

BAR RACKS

BAR RACK SHELVES

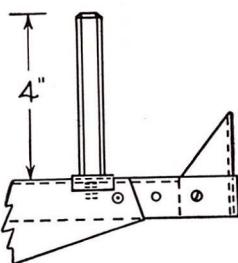

Shelves are used on single or double face rack arms when long items must be stored on a flat surface or when pieces are too short to rest on arms. Shelves reinforced front and rear.

SIZES

- No. 1796-121—36" x 12"
- No. 1796-125—48" x 12"

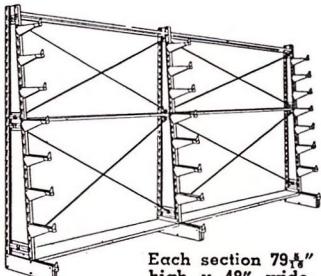

SEPARATOR PEG

No. 1795-16

Hexagon separator pegs may be attached anywhere on the arms to keep articles separated. Pegs 4" high, readily adjusted.

SINGLE FACE BAR RACKS

Each section 79 $\frac{5}{16}$ " high x 48" wide.

Arms used on one side only so rack can be placed against wall. Otherwise this rack is like the double face type above and can be had in the same lengths and heights.

Bars — tubes — shapes — rods — posts — or any bulk flat storage can be taken care of better with the Lyon Bar Rack because:

1. Material is easily selected, several types may be segregated on one arm. Arms are horizontal for most efficient use.
2. Wide aisles are not necessary for removing long material from rack as required when pieces are stored from the end or vertically.
3. No upright interference for loading by hand or crane.
4. Arms are adjustable on 3" centers with spacing as close as 9" between arms.
5. Aisles are always free for trucks or traffic.

Available in double face and single face models for center floor and against wall use. Finished in Lyon Green baked enamel. Shipped knocked down.

SIZES

DOUBLE FACE 79 $\frac{5}{16}$ " HIGH

- No. 28-36—First Section, 36" wide, (2 uprights, 28 arms).
- No. 28-236—Additional 36" wide, (1 upright, 14 arms).
- No. 28-48—First Section, 48" wide, (2 uprights, 28 arms).
- No. 28-248—Additional 48" wide, (1 upright, 14 arms).

DOUBLE FACE 97 $\frac{5}{16}$ " HIGH

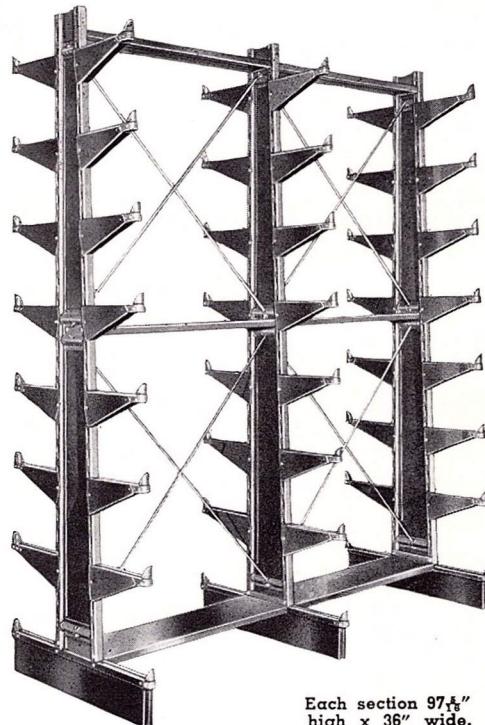

- No. 28-1036—First Section, 36" wide, (2 uprights, 28 arms).
- No. 28-1236—Additional 36" wide, (1 upright, 14 arms).
- No. 28-1048—First Section, 48" wide, (2 uprights, 28 arms).
- No. 28-1248—Additional 48" wide, (1 upright, 14 arms).

SINGLE FACE 79 $\frac{5}{16}$ " HIGH

- No. 31-36—First Section, 36" wide, (2 uprights, 14 arms).
- No. 31-236—Additional 36" wide, (1 upright, 7 arms).
- No. 31-48—First Section, 48" wide, (2 uprights, 14 arms).
- No. 31-248—Additional 48" wide, (1 upright, 7 arms).

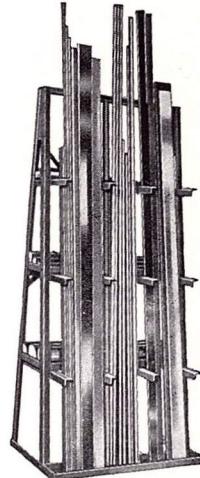

SINGLE FACE 97 $\frac{5}{16}$ " HIGH

- No. 31-1036—First Section, 36" wide, (2 uprights, 14 arms).
- No. 31-1236—Additional 36" wide, (1 upright, 7 arms).
- No. 31-1048—First Section, 48" wide, (2 uprights, 14 arms).
- No. 31-1248—Additional 48" wide, (1 upright, 7 arms).

Each section 97 $\frac{5}{16}$ " high x 36" wide.

VERTICAL BAR RACK

The Vertical Bar Rack keeps a limited supply of long parts close to the job. Long pieces stack vertically; shorter pieces are kept in the three pan shelves spaced at 21" intervals. Finished in Lyon Green enamel.

No. 86-11—36" wide, 24" deep (bottom), 84" high. Bottom pan is 36" wide, 6" deep, with 1 $\frac{1}{2}$ " high flange.

SHOP BOXES

STYLE "H"

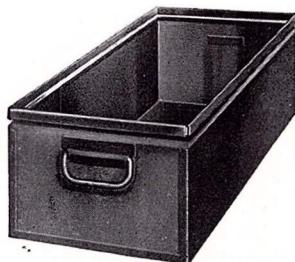

Built for heavy loads from 75 to 125 lbs., and for hard, rough usage. Corners formed to give extra reinforcement. Tapered for efficient stacking. Fitted with shallow "V" shaped runners that support bottom of box and reduce friction on gravity conveyor.

STANDARD GAUGES AND SIZES

Number	Gauge	Width (Top)	Length (Top)	*Height
421F14	18	12"	18"	6"
421F15	18	12"	21"	6"

*Overall height including runners.

Other sizes may be secured if ordered in production quantities.

STYLE "R"

Box is particularly rigid when stacked because the inside rail extends around all four sides. Three piece construction. Corners are reinforced by forming over a corner band reinforcement spot welded and riveted in place. Cannot be fitted with runners.

STANDARD GAUGES AND SIZES

Number	Gauge	Width	Length	Height
440F11	16	10"	20"	8"

Other sizes may be secured if ordered in production quantities.

STYLE "RB"

A two-purpose stock container. It provides a strong stacking box for transportation from one operation to the next and may be stacked on the floor and used for regular stock storage. Open hopper end permits easy removal of stock. Front top rail is rounded for use as handle and support to keep box in alignment.

STANDARD GAUGES AND SIZES

Number	Gauge	Width	Length	Height
445F11	16	10"	20"	8"

Other sizes may be secured if ordered in production quantities.

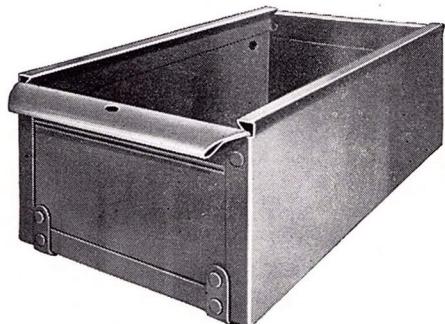

NESTING PANS

For handling all kinds of parts safely and economically. Pans occupy little space when not in use. The "L" Pan is made complete from a single sheet of steel. Portions cut out and thrown away in making the average pan are folded into extra reinforcements to strengthen this exclusive Lyon product on the corners. Folds extend down the corners and, in addition to being welded, are clamped tightly under the hem. Four thicknesses of steel where hem overlaps corner braces.

STANDARD GAUGES AND SIZES

Number	Gauge	Width (Top)	Length (Top)	Height
410F16	16	11"	22"	6"
410F18	18	11"	22"	6"

Available in this one size only.

STYLE "O"

Style "O" Boxes are made to carry loads of 50 to 125 pounds and will withstand severe shop abuse. Box is of three piece construction with one piece forming bottom and two sides. Each end and corresponding handle are made in one piece and are riveted and welded in place for maximum strength. Runners are attached to both ends of the box with two rivets and fully support the bottom. Oval shape of runners reduces friction when box is dragged over the floor or handled on gravity conveyor.

STANDARD GAUGES AND SIZES

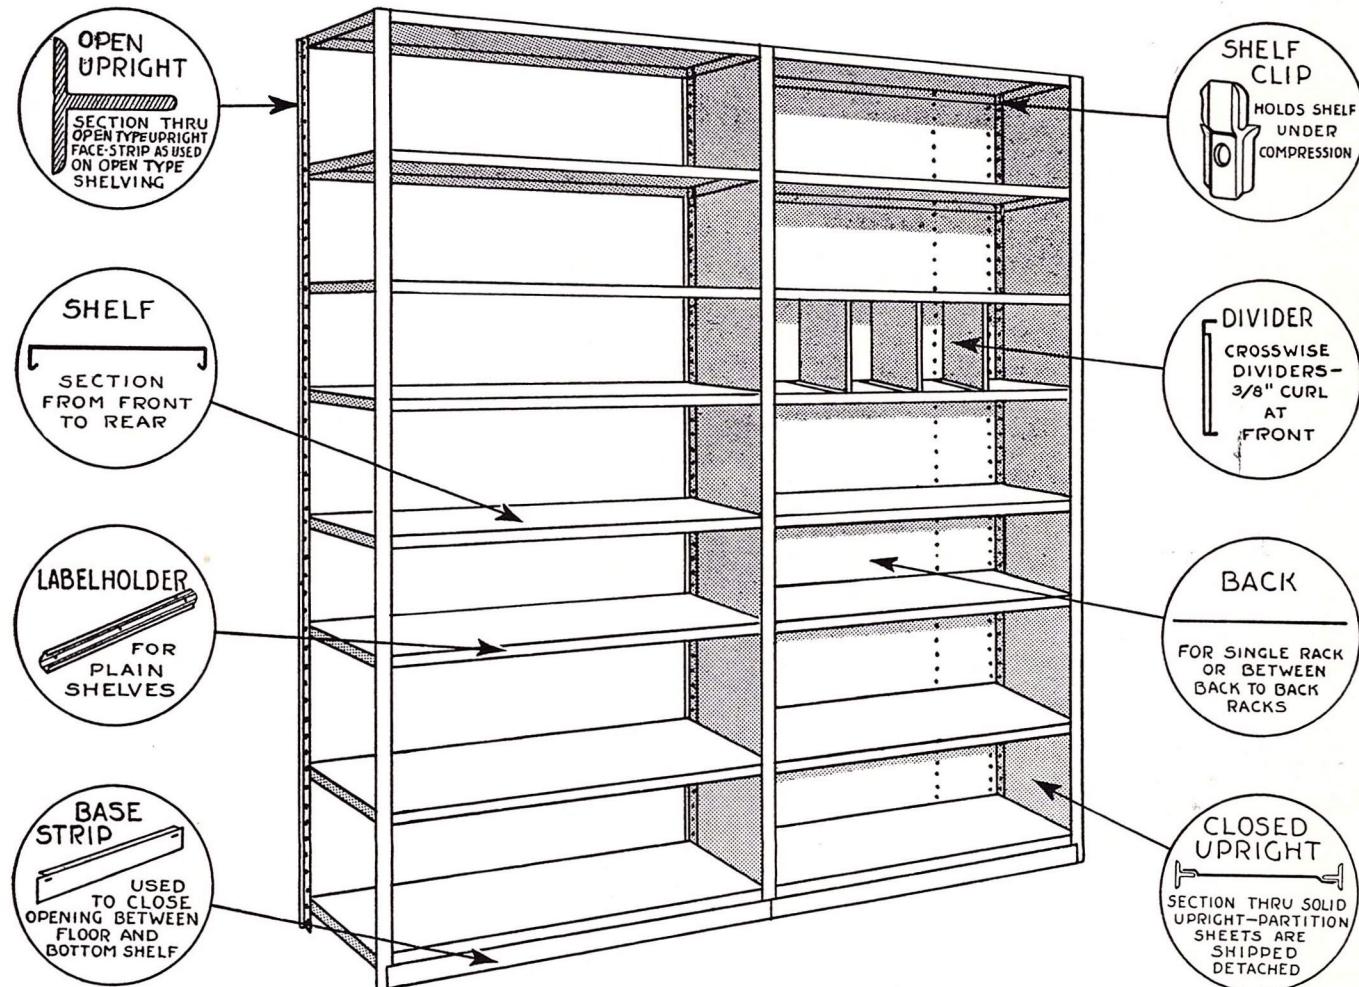

Number	Gauge	Width	Length	*Height
425F11	18	11 $\frac{3}{8}$ "	22"	7 $\frac{5}{8}$ "
425F12	18	11 $\frac{3}{8}$ "	15 $\frac{1}{2}$ "	4 $\frac{3}{4}$ "

*Overall height.

Other sizes may be secured if ordered in production quantities.

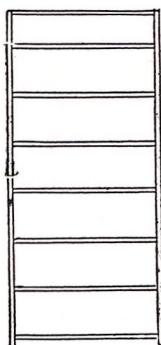

STEELART SHELVING

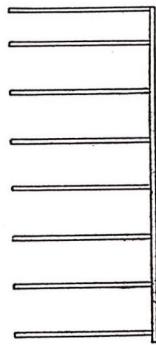

The simplicity of Lyon Steelart Shelving is illustrated in the sketch above—showing the few simple, well designed parts that are necessary to provide strong, efficient storage equipment. The advantages are obvious. A certain rack arrangement

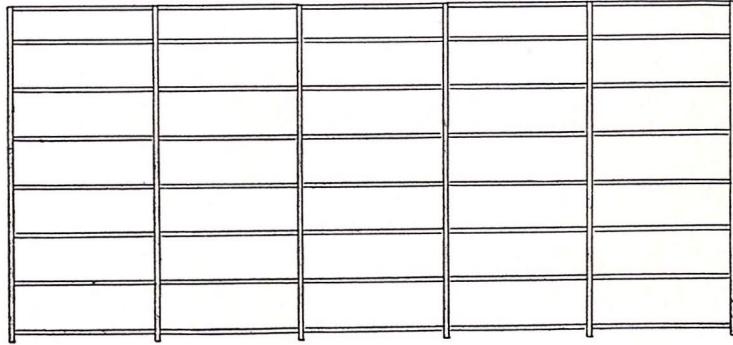

of shelving may be ideal for present requirements. Later it may be desirable to add additional shelves, dividers, or even complete sections. You are assured by Lyon's 43 years' of service to customers that all new parts will fit perfectly with the old.

FIRST SECTION
Two uprights and shelves—with dividers if desired.

ADDITIONAL SECTION
One upright and shelves—with dividers if desired.

COMPLETE RACK
One first, or starting section and as many additional sections as may be required. One first and four additional sections illustrated. For actual overall width of Rack, add $1\frac{1}{8}$ " to first section, and $\frac{3}{16}$ " to each additional section.

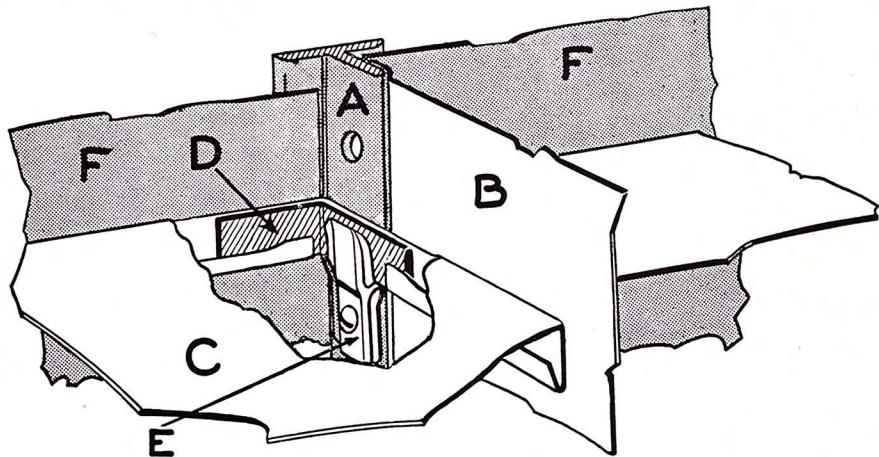

STEELART SHELVING

A & B UPRIGHT: Uprights are made from specially rolled hard steel Tee $1\frac{1}{2}'' \times 1\frac{1}{2}'' \times \frac{1}{8}''$ punched on $1\frac{1}{2}''$ centers for adjustment of shelves. Two Tees (A) with necessary cross braces form an open upright. A partition sheet (B) bolted between two Tees forms a closed upright.

C & D SHELF: Only one type of shelf is required—used either for top, bottom or intermediate shelf. Each shelf is punched horizontally on 3" centers at front and rear for attachment of dividers. Shelf (C) is fitted with 1" wide band corner reinforcements (D) at each of the four corners. Shelf is flanged down $1\frac{1}{8}''$ at all four edges and back $\frac{1}{2}''$ for strength and rigidity. Reinforcements for both front and rear flanges of shelves are available.

E SHELF CLIP: As illustrated above, the shelf is attached by means of a compression clip at each

Cut-away Section of Lyon Steelart Shelving Showing Uprights, Shelf, Shelf Clip and Back.

of the four corners. These grip the shelf tightly to the upright in a manner that adds rigidity to the entire rack. Notice erection simplicity—bolt clips to uprights, put shelf in position, and drive down between clip and upright T.

F BACKS: Backs fit snugly to rack and are punched on $1\frac{1}{2}''$ centers for adjustment of shelves.

ACCESSORIES

DIVIDERS: Dividers can be quickly attached or removed at any time without disturbing any other parts. They are adjustable on 3" centers and are made in sizes to fit the full height of shelf opening, eliminating any possibility of contents getting into the next compartment. Front and rear vertical edges are reinforced with a roll formation for extra strength and stiffness.

LABELHOLDERS: Labelholders may be added to shelves on all rack assemblies. If desired, they must be ordered as extras (see page 27).

SWINGING DOORS: Double swinging doors are available for Lyon Steelart Shelving Racks when it is desirable to keep contents clean and safe. The doors latch at three points—top, bottom, and center. Flat key lock is extra and must be specified.

ERCTION: One advantage of Lyon Steelart Shelving is the speed and ease with which it can be erected—and the ease with which adjustments

are made. In erecting, clips are merely bolted to uprights and shelves driven into place. Backs, dividers, and labelholders may then be added.

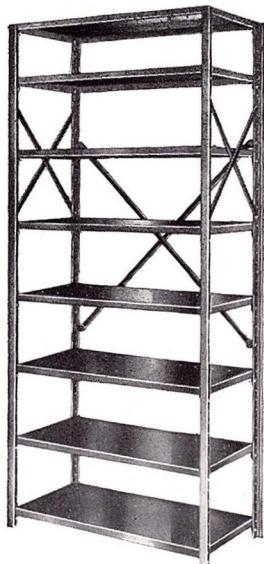

FINISH: All shelving and accessories finished in durable Lyon Green baked enamel.

SIZES: Assembled units and parts shown are regular standard sizes that will meet practically every requirement to which this type of shelving is adapted. If you have any sizes or arrangements not illustrated consult the Lyon District Office.

ORDERING: In ordering complete racks, order by Rack Number, number of First and Additional Sections, and Size. In ordering parts list all items showing (1) Quantity (2) Descriptive Name (3) Listed Size. The best method to use in listing the parts required correctly is to make rough front elevation line drawing of complete racks and then count the number of uprights, shelves, and accessories required.

UPRIGHT

STEELART SHELVING

Uprights (Closed)

Consists of two upright Tees and one partition sheet, both punched every $1\frac{1}{2}$ " for attachment of shelves. Partition sheet is off-set on both vertical edges to fit snugly around inside of Tee. Tees and partition sheet shipped separately and bolted together when rack is erected.

Sizes shown below are width x height.

SIZES

12x60	15x60	18x60	24x60
12x72	15x72	18x72	24x72
12x78	15x78	18x78	24x78
12x84	15x84	18x84	24x84
12x90	15x90	18x90	24x90
12x96	15x96	18x96	24x96

12x120	15x120	18x120	24x120

Uprights (Open)

Consist of two upright Tees with necessary cross braces. Like the Tees used on closed uprights, they are punched every $1\frac{1}{2}$ " for attachment of shelves on the inside of Tee to present a smooth surface on the exposed face.

Sizes shown below are width x height.

SIZES

12x60	15x60	18x60	24x60
12x72	15x72	18x72	24x72
12x78	15x78	18x78	24x78
12x84	15x84	18x84	24x84
12x90	15x90	18x90	24x90
12x96	15x96	18x96	24x96
12x108	15x108	18x108	24x108
12x120	15x120	18x120	24x120

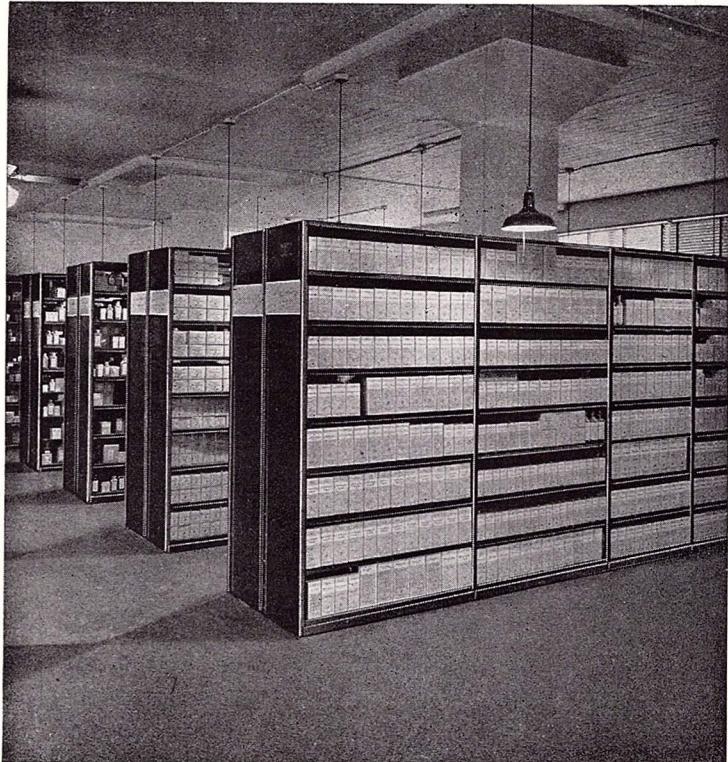

Shelves

Shelves are flanged down and back at an angle on all edges for greater strength. Each shelf is furnished with four compression clips for attaching to upright Tees. Punched horizontally every 3" for the attachment of dividers. Label-holders not furnished with shelf.

SIZE

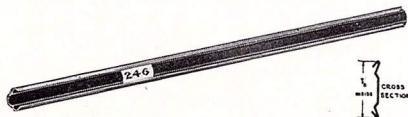

Width	Depth	Width	Depth		
36	x	12	42	x	12
36	x	15	42	x	15
36	x	18	42	x	18
36	x	24	42	x	24

STEELART SHELVING

Labelholders

All shelves are punched for attachment of friction type holder that prevents labels from sliding under wrong item. Will accommodate $\frac{13}{16}$ " card or label. Labelholders are 3" shorter than listed width. Labelholders must be ordered as extra parts.

SIZE

36" x $\frac{7}{8}$ "

42" x $\frac{7}{8}$ "

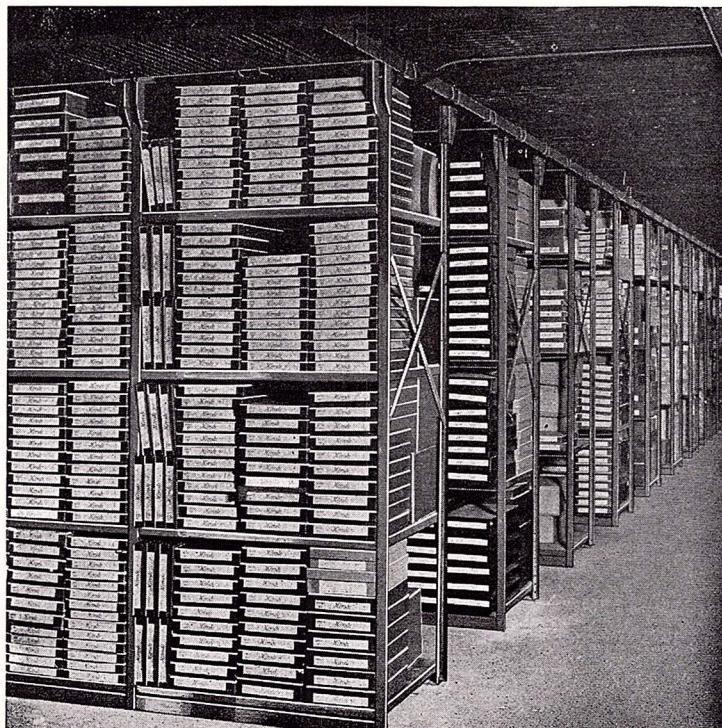

Dividers

Flanged at right angles at top and bottom for attachment to shelf above and below, and reinforced at front and rear vertical edges with rolled edge.

Sizes shown below are depth x height.

SIZES

12x6	15x6	18x6	24x6
12x9	15x9	18x9	24x9
12x12	15x12	18x12	24x12
12x15	15x15	18x15	24x15
12x18	15x18	18x18	24x18

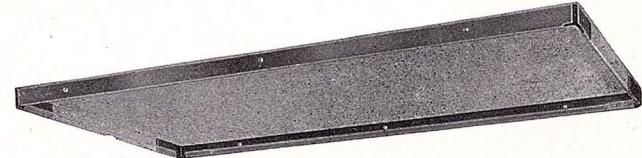

Shelf Reinforcements

Shelves may be strengthened by bolting reinforcements to front flange or to both front and rear flanges. Specify 36" or 42" length. Reinforcements are shipped loose.

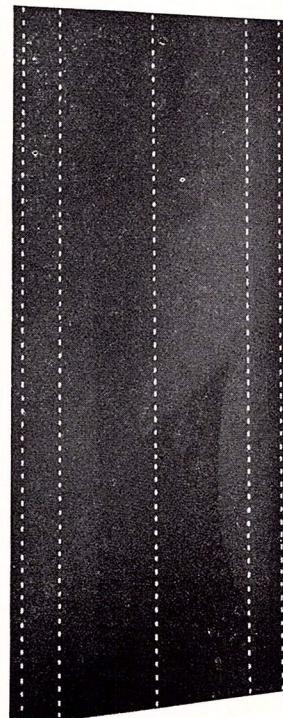

Bottom view, showing reinforcement bolted to front flange of shelf.

Bottom view, showing reinforcements bolted to front and rear flanges of shelf.

Backs

For use on a single face rack the back is placed between rear Tees and shelf and bolted to shelves. When used between two racks placed back to back it is inserted between adjacent Tee faces. Back punched every $1\frac{1}{2}$ " for attachment of shelves.

Sizes shown below are width x height.

SIZES

36x60	36x96	42x84
36x72	36x108	42x90

36" wide, 78" high
36" wide, 84" high

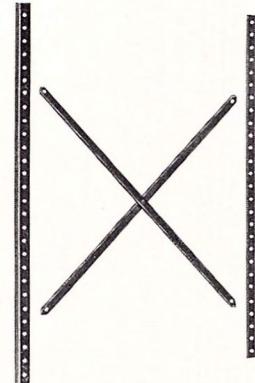

COUNTER UPRIGHTS

Open

Consists of two upright Tees with cross brace. Tees are exactly like those used on the closed uprights for counters, the tops being rounded and punching being arranged to accommodate counter assembly.

SIZE

Depth Height 18" x 36"	Depth Height 18" x 39"
24" x 36"	24" x 39"

COUNTER TOPS

A heavy steel top with a smooth working surface free from bolt heads or holes. Ends exposed, present a finished appearance.

SIZES

36" wide, 18" deep
36" wide, 24" deep

End Finishing Strips

Optional End Finishing Strips provide full finished ends for Counter Tops, adding to the appearance.

Two Sizes: 18" deep and 24" deep.

BASE STRIPS

Used to fill in space below bottom shelf. Improves appearance, prevents dirt from accumulating under rack. Fastened to rack with sliding clips for easy removal.

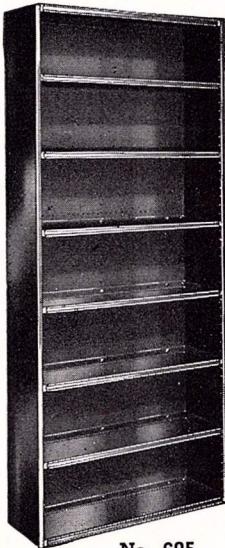

SIZE

36" wide x 3" high 42" wide x 3" high

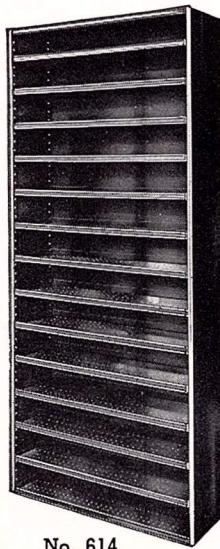

PARTS AND SUPPLY BINS

All Bins Finished in Lyon Green Baked Enamel

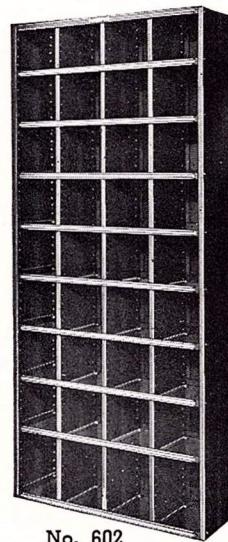

No. 605

7 openings — 36" x 12" x 12". This is the most adaptable of all bin units. Ideal for nearly all parts and merchandise display.

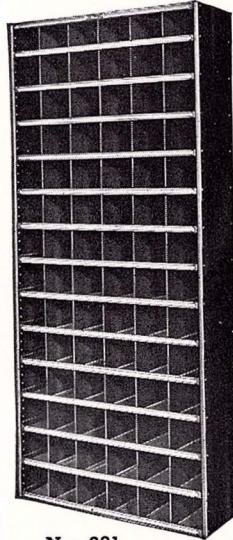

No. 614

14 openings — 36" x 12" x 6". Long parts merchandise and small flat items can be stored conveniently in this unit.

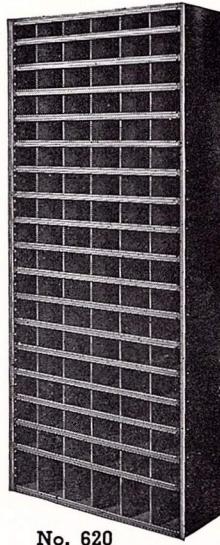

No. 602

36 openings — 32-9" x 12" x 9"; 4-9" x 12" x 12". For larger items, not in cartons, which must be kept separate.

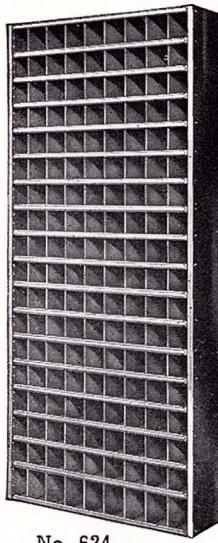

No. 601

84 openings — 6" x 12" x 6". Especially adaptable for the storage of small size parts, bolts, nuts, and pins.

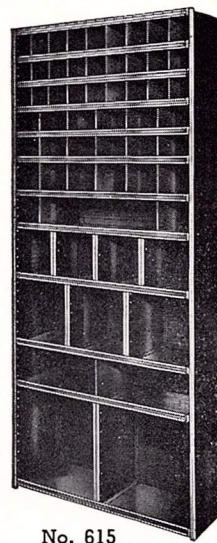

No. 620

108 openings — 102-6" x 12" x 4½"; 6-6" x 12" x 7½". For the many small parts that can be safely stored without boxes. Dividers can be adjusted on 1" centers.

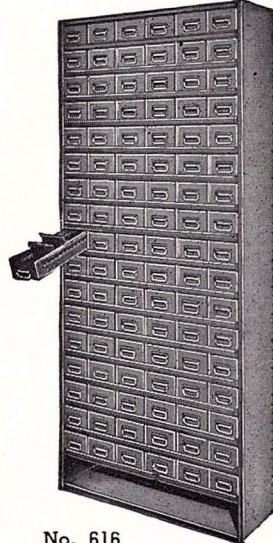

No. 624

162 openings — 144-4" x 12" x 4½"; 18-4" x 12" x 6". For storing a large variety of small parts in small quantities. Dividers can be adjusted on 1" centers to fit the stock.

No. 615

59 openings — 9-4" x 12" x 6"; 12-6" x 12" x 4½"; 1-24" x 12" x 6"; 3-12" x 12" x 12"; 18-4" x 12" x 4½"; 8-6" x 12" x 6"; 4-9" x 12" x 9"; 2-18" x 12" x 7½"; 2-18" x 12" x 18".

No. 616

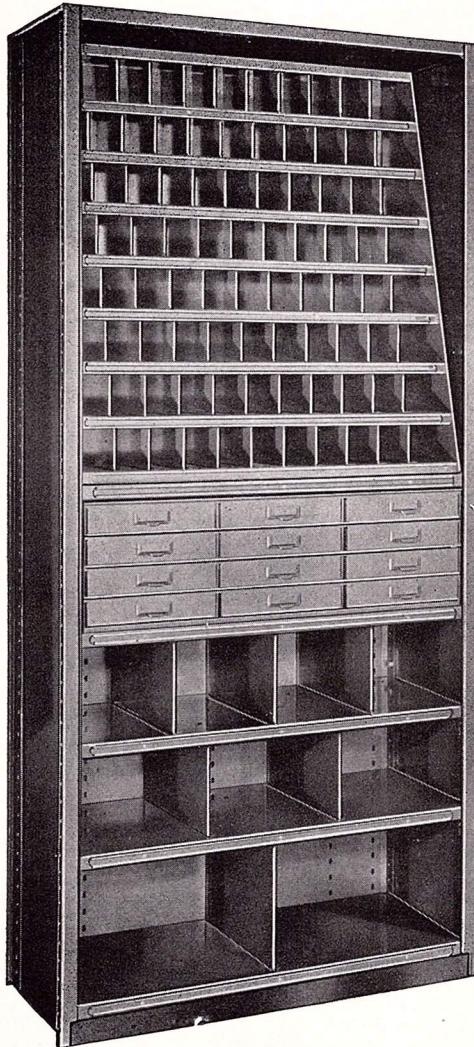

Furnished with 102 "M" boxes. Each box is fitted with three adjustable dividers. Opening at bottom is 36" x 12" x 7½". Especially designed for small quantities of small parts, nuts, bolts, washers, etc.

- Dividers in all Lyon Bins are adjustable horizon fasteners—no nuts, bolts, or tools required. All No. 959-11 Double Swinging Doors on a

tally on 1" centers using Lyon patented "Snap-in" Bins shown are 36" wide, 12" deep and 84" high. rigid frame are available for all Lyon Bins.

TOOL STORAGE

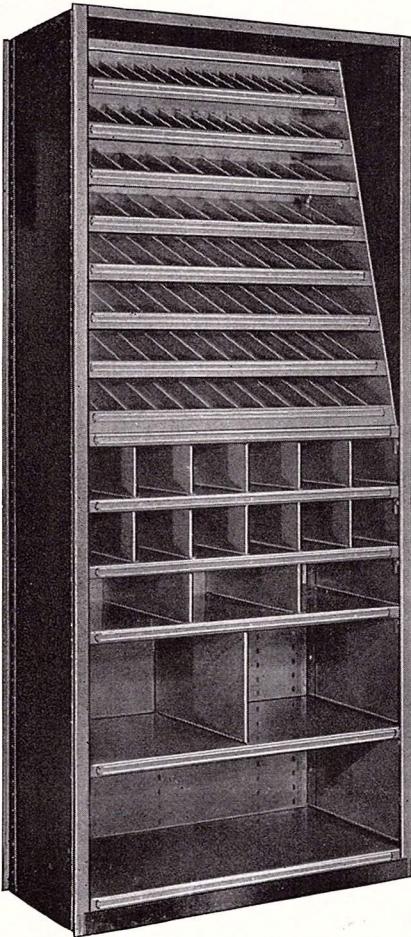

SE-1 (First Section) Consists of:

- 2 Closed Uprights 18" x 84"

SHELF STORAGE: For all types of tools, small dies and jigs, and miscellaneous items that cannot be stored in inserts.

ACCESSORY EQUIPMENT: Steel Swinging Doors, Counters, Bar Racks, Benches, Cabinets, Shop Desks and many other items that are neces-

sary for an efficiently operated Toolroom are illustrated and described elsewhere in this catalog.
FINISH: Lyon Green baked enamel.

NOTE: WHEN TWO OR MORE SECTIONS ARE USED TO FORM A CONTINUOUS RACK, TWO UPRIGHTS ARE REQUIRED FOR THE FIRST SECTION AND ONLY ONE UPRIGHT FOR EACH ADDITIONAL SECTION.

STORAGE AND DISPLAY UNITS

FINISHED IN GREEN BAKED ENAMEL — SHIPPED SET UP

Sloping Front Unit
No. 10-1

Has 88 openings on 8 shelves. Shelf dividers can be adjusted horizontally every inch with "snap-in" fasteners — no tools required. Each shelf has a labelholder. Check hooks extra.

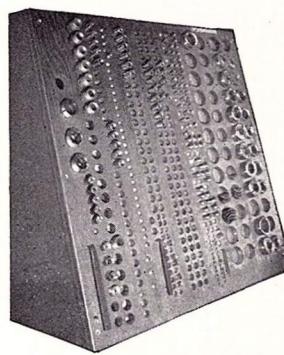

Size: 34½" wide, 17½" deep, 37⁵/₈" high overall.

Sloping Shelf Unit
No. 11-2

Contains 108 sloping compartments on 8 shelves. Shelf edges turned up to form bin fronts. Dividers adjustable every inch. Check hooks extra.

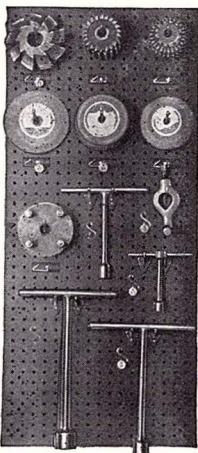

Size: 34½" wide, 17½" deep, 37⁵/₈" high—overall.

Sloping Front Display and
Storage Board
No. 15-6

Two ½" thick plywood panels superimposed on a steel frame. Top panel may be removed and drilled exact sizes desired or pegs or hooks inserted in it. Short labelholders may be attached with wood screws.

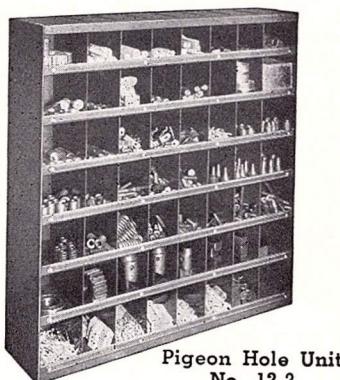

Size: 34½" wide, 14¾" deep, 37⁵/₈" high.

Mounting Panel
No. 18-9

Panel can be used for display or storage of any parts or tools that can be hung on Tool Peg, No. 2741-190 or check hooks No. 92-13 and No. 2741-191. Panels may be hung on back or ends of racks, or fastened to wall or stock room partitions. Holes punched on 1" centers.

Size: 17⁹/₁₆" wide, 42" high.

Pigeon Hole Unit
No. 12-3

Has 56 openings on seven shelves. Front edge of each shelf is turned up to form a bin front and provided with a labelholder. Dividers adjustable.

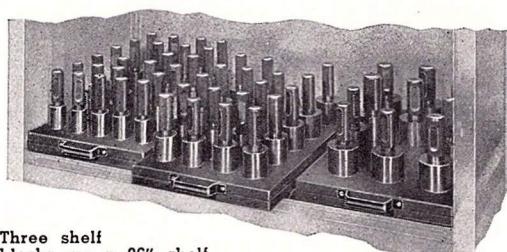

Size: 34½" wide, 9" deep, 37⁵/₈" high—overall.

Six Shelf Unit
No. 14-5

For drills, reamers, mandrels and arbors not over 17" long or 2" in diameter. 66 compartments on six shelves. Shelf edges form bin fronts. Check hooks extra.

Size: 34½" wide, 17" deep, 37⁵/₈" high—overall.

Three shelf
blocks on a 36" shelf.

Removable Shelf Block No. 66-16

Consists of two pieces of ½" plywood bolted together with handle. Top piece can be removed and drilled sizes required. When ordering specify number of blocks required. Size: 11" wide, 17" deep.

Tool Ledge
No. 91-12

The No. 91-12 Tool Ledge is attached to the No. 18-9 Tool Panel with No. 2741-190 Tool Pegs. As illustrated, the Tool Ledge is convenient for storage of small tools which are used quite often and must be quickly accessible. Two Tool Pegs furnished with ledge.

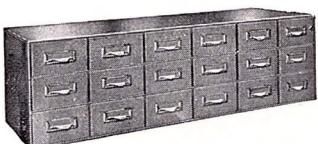

Size: 15" wide, 3½" deep.

STOCK CART

The Stock Handling Cart saves steps and material handling (1) as an assembly line feeder, (2) in stock rooms, (3) in the tool room handling light tools, (4) in shipping departments, and (5) in receiving departments, etc. Composition casters 5" x 1"—stationary on the front and swivel on the back—and steel push bar. Optional tray may be bolted to legs midway between top and bottom trays. Lyon Green enamel finish. Shipped set up.

SIZES

No. 2000-11 Stock Handling Cart 30" long, 16" wide, 32" high—overall.
No. 2001-21 Extra Center Tray.

DESK ACCESSORY

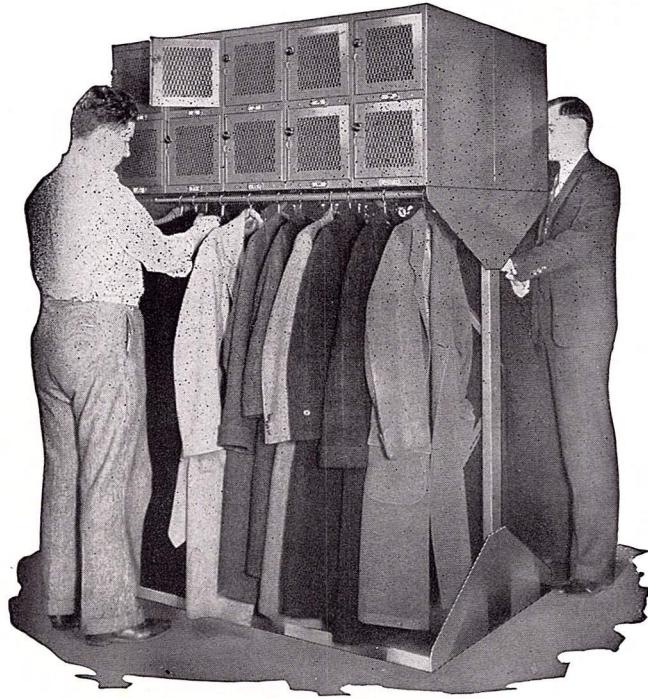

Desk surface is 16" wide and 14" deep with 5° slope.
No. 2385-11—16" wide, 14" deep.

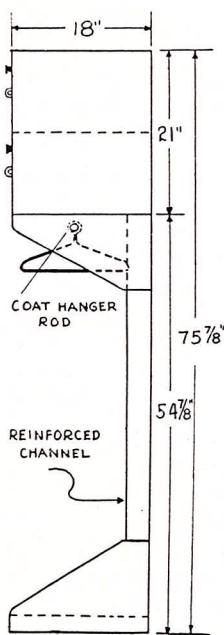

SHOPROBES

Patent No. 2-202-427

The double face Shoprobe above will accommodate 20 persons in 12½ square feet of floor space.

END ELEVATION SINGLE FACE

The single face Shoprobe will accommodate 10 persons in 6 ¼ square feet of floor area. As all compartments and hangers are on one side it may be used against the wall.

Rod is inserted through closed loops on the hangers so they cannot be removed after the Shoprobe is erected. Chain is run through sleeve of coat and locked with a padlock to the small compartment door—securing both the coat and contents of the compartment. (Padlocks not furnished).

Lock chain is extra and must be specified when ordering.

The Lyon Shoprobe is the newest and most practical clothes storage unit for use where floor space is limited and low cost is a prime requirement. It is especially suited to industries where personnel fluctuates. Finished in green baked enamel. Shipped set up with standards and base detached. Lock chains extra. Padlocks not furnished. Unless order specifies otherwise openings will be numbered from 1 up.

SPECIFICATIONS

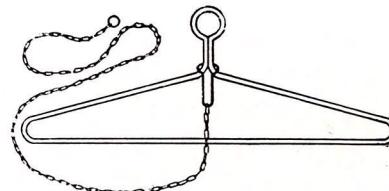

No. 2065-12, Double face—20 person capacity; 50" wide, 36" deep, 75 7/8" high.

No. 2065-11, Single face—10 person capacity; 50" wide, 18" deep, 75 7/8" high.

ADVANTAGES OF THE LYON SHOPROBE

1. Low cost private compartment storage per person.
2. Full length coat hanging space.
3. Security of coats and belongings against petty thievery when coat hanger with lock chain and padlock is used.
4. 100% portability—easily moved from one department to another, or from building to building.
5. Requires minimum floor space per person accommodated.
6. Complete circulation of air around clothing.
7. Diamond perforated doors permit inspection of locked compartments.
8. Bottom base keeps clothes off the floor and out of the way of sweepers. Overshoes are not mixed or lost.
9. All compartment openings at convenient height—no stooping.

LOCK CHAIN No. 2073P12

STEEL LOCKERS

Single Tier

THE SINGLE TIER LOCKER is the most practical and widely used of all types of lockers. This is particularly true where space is available and where it is necessary to provide extended period storage for overcoats and other full length garments.

Lyon Lockers are designed primarily to give continued service through years of hard use. They are constructed from sturdy, standardized interchangeable parts and suitably ranged in types and sizes to amply care for the various requirements and uses.

Lockers 12" wide have three single prong and one double prong coat hook. Lockers over 12" wide have four single prong and one double prong hooks. Lockers equipped with shelf 8½" from the top. 18" deep lockers include coat rod—double prong ceiling hook is omitted. Doors are louvered at top and bottom for ventilation and fitted with a number plate.

SIZES

LYON LOCKER FEATURES

1. Arc welded frame—vertical and horizontal members made of hard rolled angle steel.
2. Door stop prevents damage to adjacent locker.
3. Handle guard protects malleable iron trigger—prevents breakage and loose handles.

STEEL LOCKERS

Double Tier

The Double Tier Locker is economical as to space and cost, and will be found satisfactory for a great many uses, particularly for short period occupancy, and where long coats are not worn.

The same sturdy door frame used in the single tier locker is also used in the double tier. This feature provides the necessary smooth operation which is particularly desirable in the case of the double tier locker, where, because of the limited space, contents are frequently crowded, and hinges, door and frame considerably strained.

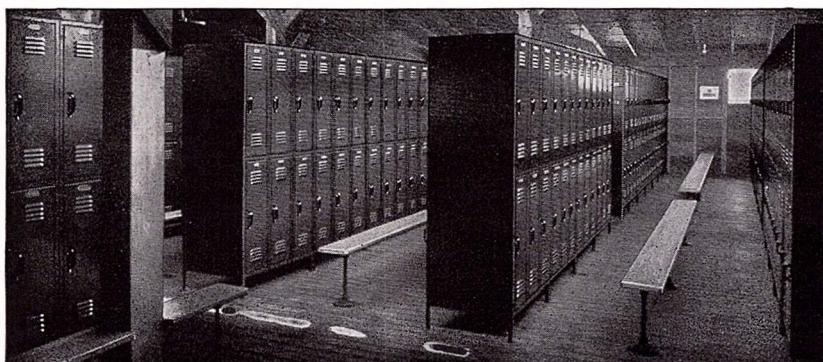

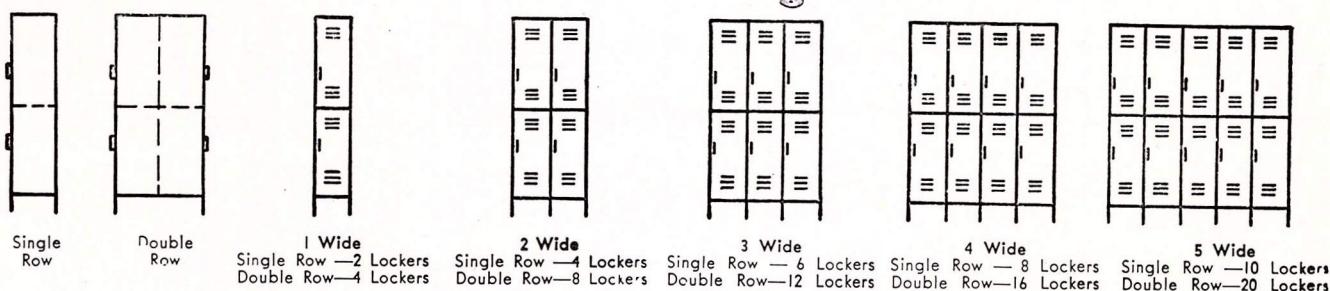

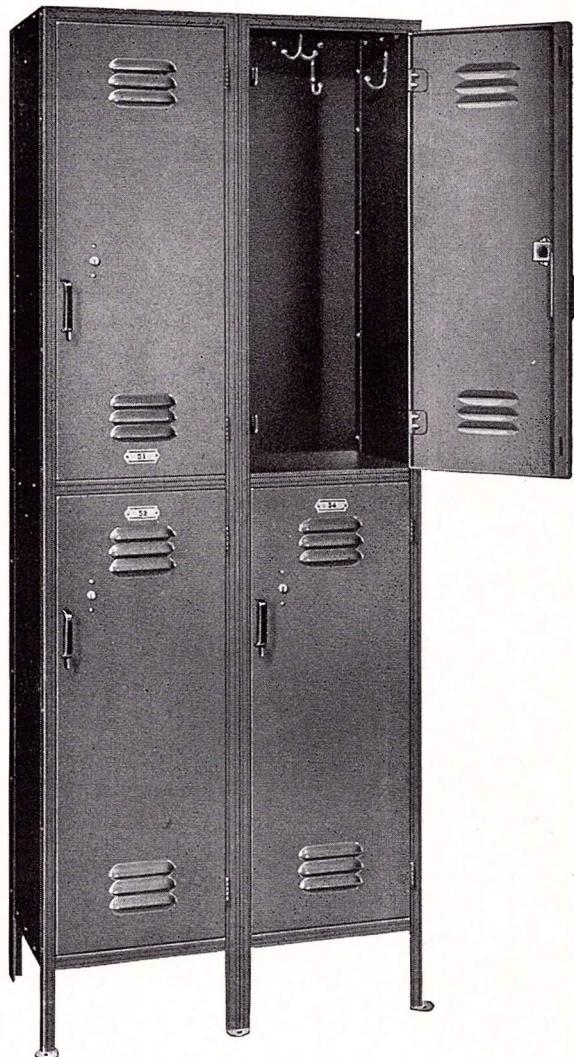

Lockers 12" wide have three single prong and one double prong coat hook. Lockers over 12" wide have four single prong and one double prong coat hook. Doors are louvered at top and bottom for ventilation and fitted with a number plate.

SIZES

12 x 12 x 30	12 x 15 x 36	12 x 15 x 42
12 x 12 x 36	15 x 15 x 36	15 x 15 x 42
	12 x 12 x 42	

All sizes shown above are available in Single Row and Double Row arrangement.

See instructions at bottom of page 38, before ordering.

LYON LOCKER FEATURES

1. 16 gauge full loop hinges with recessed pin for security and appearance.
2. Rubber silencers for quiet operation.
3. Annealed wire coat hooks will not break.

Multiple Tier Lockers

The Multiple Tier (Box) Locker has a wide variety of uses for the storage of individual belongings and supplies in classrooms, laboratories, gymnasiums, bowling alleys and vocational schools.

Lyon Multiple Tier Lockers have the same general construction as the Lyon Single and Double Tier Lockers. They can be secured in a wide range of sizes and equipped with either padlock attachment or built-in flat key locks. Locker doors have one-point latch. Box Lockers with padlock attachment have handle and catch to hold door closed. Door knob is eliminated when built-in flat key lock is furnished. All lockers have individual number plates.

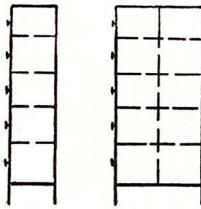

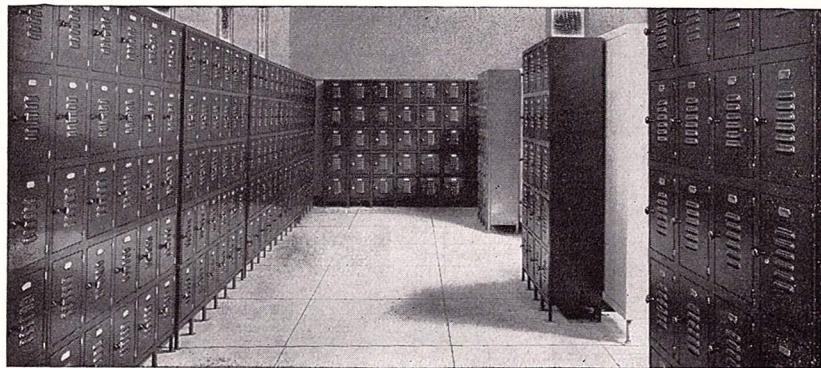

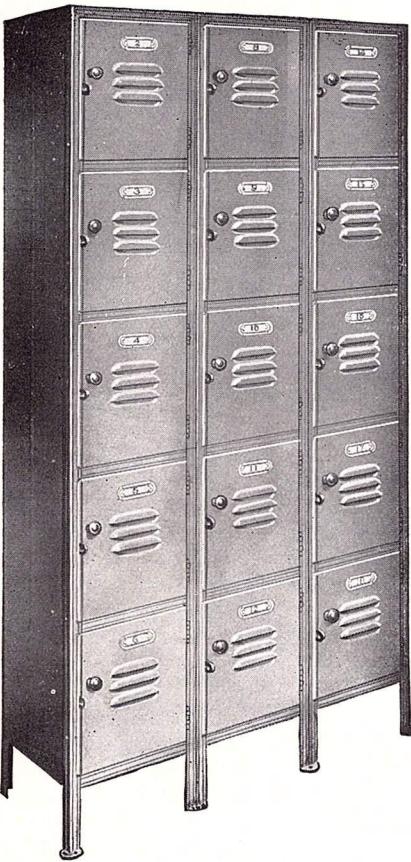

SIZES (Per Opening)

Width	Depth	Height	Tiers

READ THESE INSTRUCTIONS BEFORE ORDERING LOCKERS

GENERAL INSTRUCTIONS: Price shown in price list is per locker door opening and applies to lockers with standard equipment—without lock—shipped knocked down. Note: A Locker door opening is a single locker in a tier of 1, 2, 4, or 5 door openings high; 1, 2, 3, 4, or 5 units wide.

In ordering specify number of locker openings per section, and whether single row or double row. Set up sections cannot be shipped more than 5 feet long in single row, or 4 feet long in double row. In sections of two or more wide, one common side is used between two lockers.

FINISH: Lyon Green baked-on quality enamel, shipped from stock. School Brown finish is available without extra cost—shipment in manufacturing schedule.

NUMBER PLATES: Unless order specifies otherwise lockers will be numbered from 1 up.

LOCKS: Padlock attachment is a built-in part of Lyon door handle and is regular equipment whether or not built-in locks are furnished, except on Multiple Tier Lockers. Flat key lock with two keys extra and must be specified.

LYON STEEL EQUIPMENT IN USE BY VOCATIONAL SCHOOLS

Lyon Steel Shop and Tool Storage Equipment steps up efficiency in every department of vocational schools. Below is an index-chart showing typical school shops with listings of Lyon

Steel Equipment which practical school superintendents have approved for its safety factors, time-saving features, and all-round convenience to students and instructors.
